F52 Manual
10000mAh

Thank you for purchasing this product. Please read and keep the manual carefully before using this product for reference.

Specifications
Model: F52
Battery: Li-Polymer Battery
Capacity: 38.5Wh (10000mAh/3.85V)
Input: (Type-C Port/Cable)5V/3A,9V/2A,12V/1.5A (18W Max)
Output: (Type-C Port/Cable)5V/3A,9V/2.22A,10V/2.25A, 12V/1.67A (22.5W Max)
Lightning Cable Output: 5V/2.4A (12W Max)
Wireless charging Output: 5W, 7.5W, 10W, 15W (Max)
Apple Watch Output: 2W (Max)
Total Output: 5V/3A (15W Max)
Size: 109 * 71 * 21.4 mm

Display Screen Status

Instructions for use

Charging the Power Bank 1
Connect the charging cable of the charger to the Type-C input port of the F52 product and the input mode will be displayed on the screen to start charging.

Charging the Power Bank 2
Connect the Type-C cable of the F52 product to the charger, and the screen displays the input mode to start charging.

Charging the mobile phone

Connect one end of the F52 built-in cable to the mobile phone that needs to be charged, and the screen displays the output mode to start charging.

One end of the charging cable is connected to F52 Type-C Port, the other end is connected to the mobile phone that needs to be charged, and the screen displays the output mode to start charging.

Button Operation Instructions:
When the device is powered off, press the button once to turn it on. The screen will light up, and the wireless charging mode will be activated. If no charging occurs within 20 seconds, the screen will turn off, and the wireless charging mode will stop. Double-click the button to completely turn off the power bank.

Charging the iWatch

1. Use wireless charging to connect your iWatch.
2. Press the power button to start charging.

Wireless charging mobile phone:

1. Use wireless charging to connect your phone or device.
2. Press the power button to start charging.

Simultaneous input/Output of multiple devices:

It can be charged and discharged simultaneously. The Type-C port charges the power bank itself, wireless charging to charge the device, and two built-in cables also to charge the device.

Friendly Reminder
When the power bank is completely drained, the display screen will turn off. Please wait a few minutes after plugging it in to allow the screen to automatically restore, enabling you to check the remaining battery level. To ensure proper function, make sure to recharge the power bank in a timely manner to avoid a complete loss of power, which may prevent the display from showing the battery status.

Attention

- To maximize battery life span, fully charge power bank for 3.5 hours before first use.
- Store power bank in a cool and dry place.
- Do not store power bank in hot or humid environment.
- Operating temperature should be between 10 to 45°C.
- Charge and discharge at least once every three months.
- When charging a device, the power bank may feel warm, this is a normal operating temperature and should not be cause for concern.
- In normal conditions, the battery performance will decline slightly over several years.
- Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type.
- No naked flame sources, such as lighted candles, should be placed on and near the apparatus.
- Batteries (battery pack or batteries installed) shall not be exposed to excessive heat such as sunshine, fire of the like.
- Do not short circuit.
- Do not incinerate.
- Do not disassemble.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body.
