

# 433 Antenna specifications

## First, overview

This product is suitable for our remote control transmitting and receiving module: far-T1 / T2 / T2L, far-R1 / R3 / R4, micro-R1 / R2, etc  
Product, characterized by small size, long distance, low cost.

## Two, parameters

Antenna material: copper  
Frequency range: 434 Mhz,  $\pm$  30 Mhz  
Standing Bobby: 1.5  
Input impedance:  $50 \Omega$   
Antenna gain: 0 dBi  
Antenna length: 0.6cm  
Skyline polarization: vertical polarization  
Antenna Type: Spring antenna

## Three, size
