Modular Approval Request**FCC ID:** 2BF2ENAMR-P229**The following attestation addresses the requirements to support modular approval:**

Modular approval requirement	Yes (provide brief statement)	No *
(a) The radio elements must have the radio frequency circuitry shielded. Physical components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly	This RF module (Transceiver and FEM IC) is cover by a shield can.	
(b) The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal	This module used the CC1200 transceiver(TI). It's compliance with FCC CFR47 Part 15.	
(c) The module must contain power supply regulation on the module	This module used the LDO. It can be provide regulated power.	
(d) The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per Sections 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b)	This module used only fixed antenna. And internal ANT.	
(e) The module must demonstrate compliance in a stand-alone configuration	This module can perform communication without any changes from the outside.	
(f) The module must be labelled with its permanently affixed FCC ID label, or use an electronic display (See KDB Publication 784748 about labelling requirements)	We should label the FCC label on the back of the product.	
(g) The module must comply with all specific rules applicable to the transmitter. The grantee must provide comprehensive instructions to explain compliance requirements	This module used the CC1200 transceiver(TI). It's compliance with FCC CFR47 Part 15.	

Modular approval requirement	Yes (provide brief statement)	No *
(h) The module must comply with RF exposure requirements	This module used the CC1200 transceiver(TI). It's compliance with FCC CFR47 Part 15.	

* Please provide a detailed explanation if the answer is "No."

Sincerely,

Signed:
