Return ———— Menu

Signal source

Volume Up/Down ———— Focus Up/Down

———— Home Key

Connect the bluetooth remote control

Long press the two keys like the picture at the same time until the indicator light of the remote control flickers and release it until the pairing is complete.

*Bluetooth Remote Control Connection Pairing Method:

1. After turning on the projector and connecting it to the internet, click the **Bluetooth** button on the remote, and a Bluetooth connection window will pop up on the projection interface.

2. Please make sure that the distance between the remote control and the projector is within 1 meter. Then long press the "**Volume Down**" key and the "**Focus Down**" arrow key at the same time and hold for 3 to 4 seconds.

3. The screen will show scanning xxxxxx after a few seconds and the light of the remote control will flash continuously. When it shows "S**canning TXCZ_RCM**" on the screen, it means that the Bluetooth remote control connection has completed.

Note: If the Bluetooth connection fails, please try the above operations again.

* How to Fully Navigate on Netflix by Bluetooth Remote Control?

1.After finishing the Bluetooth remote control connection, you can go to the Netflix app and press the "Virtual Mouse" button to activate the virtual mouse's body sensing function .

2.Long press the "OK" button on the remote and move your hands to up/down/left/right to choose the corresponding contents for playing and fully navigate on Netflix.

Note: The Bluetooth virtual mouse function can also be used to all apps which need a mouse to fully navigate. Common apps include Netflix, Disney+, WPS etc.

Be cautious when using the remote control. Do not drop it, trample on it, or spill any liquid into its body.
Do not put the remote control near to any heat source.
Do not expose the remote control under sunlight.
Do not put the remote control in a damp place.

INSTALLATION AND DEBUGGING
1. Projector Installation

Method 1: Put it horizontally
Method 2: Hang it with mount

Note: When the projector is hung on the ceiling or in a system of rear projection, please change the projection mode accordingly.

2. Projection Modes

Go to **Menu > Settings > Projection > Installation Mode** to change the projection modes per your needs.

| 1. Front projection Ceiling mount | 2. Rear projection Ceiling mount | 3. Front projection Desk mount | 4. Rear projection Desk mount |

3. Focus Adjustment

When the image is blurred, it's recommended to manually adjust the focus to improve the clarity of the image via pressing the **Focus up/Focus down** button on the remote. If you cannot obtain satisfactory clarity through adjustment, please move the projector forward or backward.

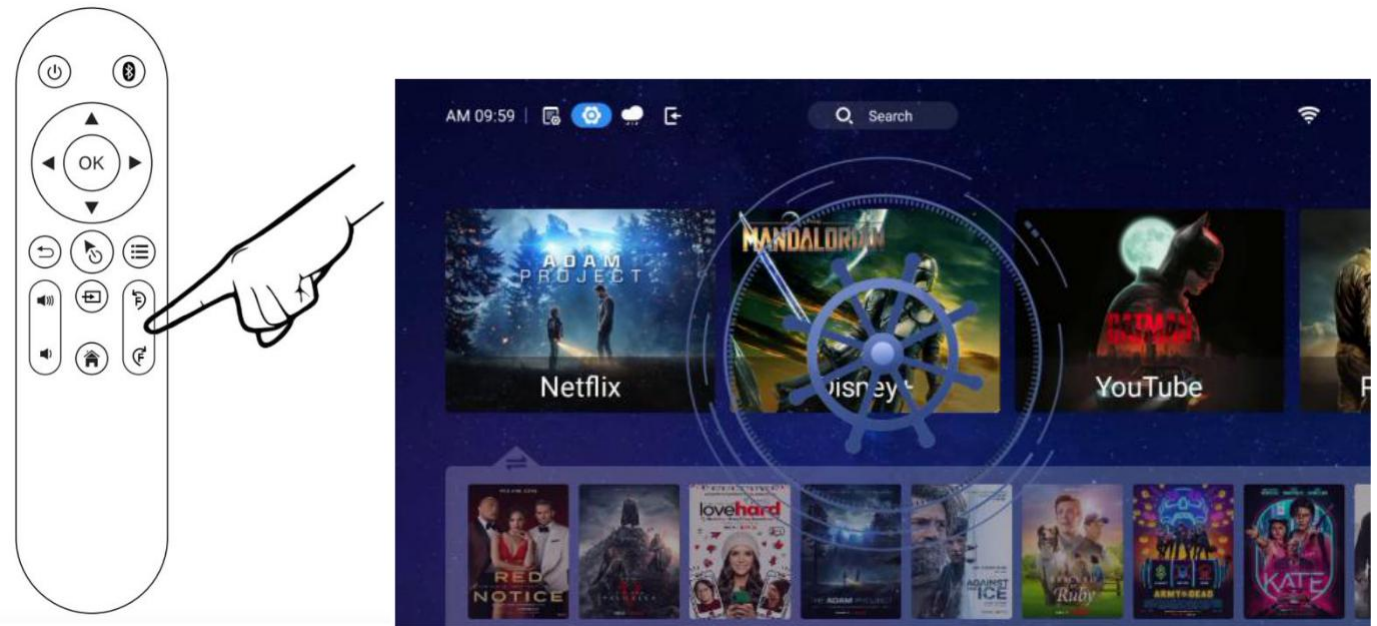

4. Electric Keystone Correction

When trapezoidal distortion occurs, the user needs to adjust the electronic trapezoidal correction under the following Settings: **Menu > Settings > Projection > Trapezoid Correction OR Foursquare Correction**.
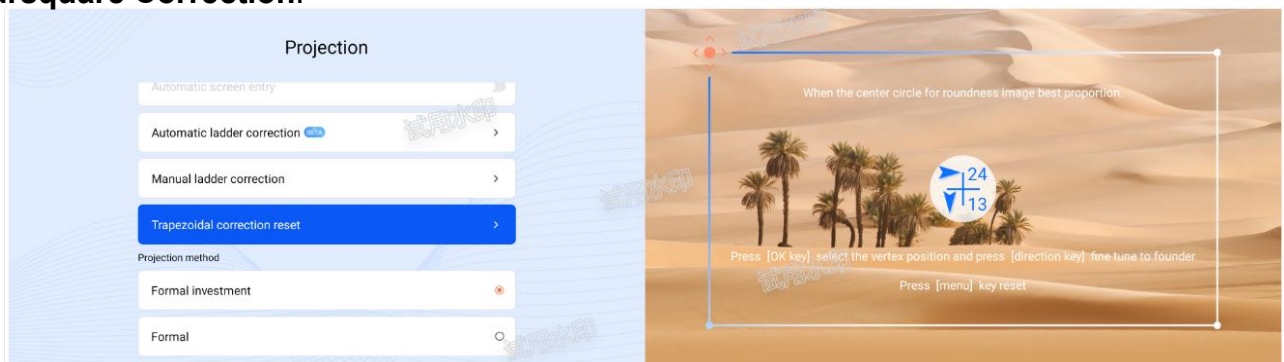

➢ For **Trapezoid correction**, you can press the direction keys up/down/right/left to make sure that the screen is rectangular.

➢ For **Foursquare Correction**, press OK button on the remote to select the four corners, and in accordance with the direction of the Arrow Diagram to adjust the corresponding trapezoidal angle via pressing the up/down/right/left direction keys.
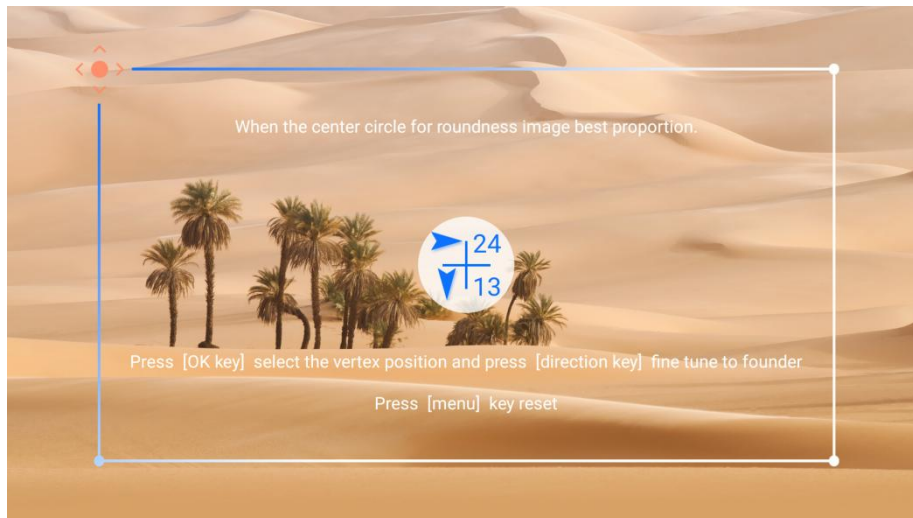

5. ZOOM Adjustment

➢ ZOOM Adjustment Range: 100% - 35%

You can adjust the projection screen size from 100% into 35% by clicking the Left " ▲ " and Right

" ▼ " button on the remote per your needs under **Settings > Projection > Global zoom** without moving the distance between the projector to the screen.

6. Projection Distance Reference

Projection Display Size(Inch)	Projection Distance (Meter)
32	1
60	1.8
100	2.85
120	3.0
200	5

Note: *Optimum Projection Distance: **2.5m-3.5M**. Dark environment will improve the clarity and sharpness of the projection picture*

7.Turn Off Safely

Press the power button on operation panel or remote control, and turn off the device according to the system prompts.

ANDROID TV OS DESKTOP

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a

particular installation. If this equipment does cause harmful interference to radio or

television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

—Reorient or relocate the receiving antenna.

—Increase the separation between the equipment and receiver.

—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

—Consult the dealer or an experienced radio/ TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Caution

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC Radiation Exposure Statement

This equipment must be installed and operated in accordance with provided instructions and the antenna(s) used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter. End-users and installers must be provide with antenna installation instructions and transmitter operating conditions for

satisfying RF exposure com
