user's manual K62 smartwatch

matters needing attention:

- 1.1 Before use, please use the configured cable to charge this product for at least 2.5 hours.
- 1.2 Before using the product, you need to connect to the app to synchronize the time and set your personal information.
- 1.3 This product supports IP68 waterproof rating and is not suitable for deep-sea diving. Corrosive liquids such as hot water and tea can be destructive to watches.

01 How to wear it

Please wear the device correctly on your wrist, about one finger away from your wrist, and adjust it to a comfortable position. The following diagram serves as a reference.

Tip: When monitoring heart rate, please wear the device tightly.

-1-

02 How to download and connect APP

02.1 Press and hold the power button to turn on the device. After entering the main interface, click on "Settings - Download App" and scan the QR code with your phone to download and install the "FitCloudPro" app. You can also scan the "FitCloudPro" QR code below to download and install the "FitCloudPro" app

02.2 Open the "FitCloudPro" application, select "Search for Devices" on the device page, and then follow the on-screen instructions.

02.3 How to connect to BT call function:

1) For most Android phones, after the watch is correctly connected to the app, a "pairing" pop-up reminder will appear, selecting to pair to K62 and then completing the connection.
For all iOS phones and some Android phones, after the watch is correctly connected to the app, you should enter the phone settings page, search for and select K62 in the

-2-

Wireless list, and then click on pairing. After pairing, you can use the BT calling function.

Tips:

1. Please upgrade the application to the latest version for a better experience.
2. It is recommended to use Android 5.0 or iOS 9.0 or higher mobile operating systems.
3. When connecting to an iPhone for the first time, a "pairing" reminder will pop up. Click on pairing and then push incoming calls and instant messages.
4. When connecting to an Android phone for the first time, a "permission" reminder will pop up. Please follow the instructions and authorize to ensure that all functions work properly.
5. To successfully connect, please turn on your phone's Wireless, GPS, and network.
6. If the device cannot be searched or connected during use, please reset or turn off the watch and try again.

-3-

03 Operating Instructions

a. Shortcut page: Swipe down from the homepage to go to the shortcut settings page.

b. Open the information component interface: slide from the bottom to the top of the main page.

c. Open the main menu interface: click the button

d. Open the shortcut page: Slide the watch's main page from right to left.

e. Quick access to dial change: Long press the dial interface for 3 seconds to enter the dial selection interface. Swipe left and right to switch dials, click confirm to switch dials
F. Power on/off: Press and hold the button for 3 seconds, then click to turn off

-4-

04 Function

100+ sports modes: You can choose from 50 sports modes and view detailed sports data in the watch's sports records.

Daily activity status: Record the daily steps, distance, and calories. More detailed information analysis and data recording can be viewed in the APP.

Telephone
Dial pad: You can enter a phone number and make a call.

Heart rate monitor: measures the current heart rate value; The app can set up scheduled heart rate measurements, and both scheduled heart rate data and real-time test data can be viewed on the app's heart rate interface

Sleep Monitor: Test the total sleep time throughout the day. The app can set the sleep time period for the entire day, during which sleep data will be collected and uploaded together with the end time.

Blood pressure monitor: detects blood pressure, and can view more detailed information analysis and data records in the APP. (This value is for reference only and cannot be used as a medical basis)

Blood oxygen monitor: detects blood oxygen levels; You can view more detailed information analysis and data records in the app. (This value is for reference only and cannot be used as a medical basis)

Weather: Display weather conditions and the weather for the next 5 days.
Weather information needs to be connected to the app to obtain data. If the connection is disconnected for a long time, weather information will not be updated.

Music control: After connecting the phone, the watch can control the playback/pause/previous/next song on the phone, and adjust the volume.

Message: Instant message reminder, displaying 8 latest messages.

Alarm clock: You can set 5 alarms, and the watch will vibrate, ring, and display

AI voice assistant:
Click on the AI voice function button, say the wake-up "word" to wake up the AI voice assistant (for example, the wake-up word for Xiaomi phones is "Xiao AI"), please ensure that the Wireless function connection is successful

Settings: Menu style/Screen display/Battery/Vibration and ringing/Language/QR code/Time settings/System

06 Other functions:

sedentary reminder, low battery reminder, incoming call reminder, remote photo taking, looking for watch, dial/customized dial, 12/24-hour timing system, unit setting, wrist rotation screen, physiological cycle reminder, goal achievement reminder

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
