

Wireless Charger Pad

InstructionManual

Products information:

Name:Wireless Charger Pad

Pad Material:ABS+Silicone

Input: DC 9V/2A

Output: 5W/7.5W/10W/15W

ConversionRate: ≤ 80%

Moble: X8

Interface:Type-CPort

Weight:0.12kg

Size:163*90*10.5mm Cable

length:100cm

- Power on: red and green lights alternate once
- Standby: red light
- Charging: green light breathing
- Full: green light
- FOD: alternating red and green flashing
- PCB biltin cable, separately design
- Greater heat spread
- Wireless charging faster and safer

Wireless charging separation technology

PCB Integration

Mobile charge
Safety technology

Led indicator to
show the charging

Precautions for use

1. Do not squeeze, collide or pull the power cord to avoid damaging the electronic parts.
2. Do not disassemble it by yourself or throw it into water or fire to avoid short-circuiting.
3. Please use it within the temperature range of -10℃-+45℃ and store it within the temperature range of -40℃ +70℃ to avoid overheating of the device.
4. Do not use in a severely humid or corrosive environment to prevent circuit damage.
5. Do not place magnetic cards or magnetic cards(ID cards, bank cards, etc.) close to the charging position to avoid magnetic card failure.
6. Do not place metal foreign objects on the surface of the wireless charger for a long time to avoid malfunctioning or heating of the device.

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

RF Exposure Statement

To maintain compliance with FCC'S RF Exposure guidelines, This equipment should be installed and operated with minimum 20cm between the radiator and your body. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.
