Solder Board-Component View 3	 A photograph of a green printed circuit board (PCB) with various electronic components, including a large black integrated circuit (IC) in the center, several smaller ICs, and a yellow circular component. The board is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
Solder Board-Component View 4	 A photograph of a green printed circuit board (PCB) with various electronic components, including a large black integrated circuit (IC) in the center, several smaller ICs, and a yellow circular component. The board is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).

Solder Board-Component View 5	 A photograph of a green printed circuit board (PCB) assembly, labeled 'Solder Board-Component View 5'. The board is populated with various electronic components, including a large black integrated circuit (IC) in the center, several smaller ICs, and surface-mount components. A white ribbon cable is connected to the left side of the board. The board is placed on a blue textured surface. A black ruler with white markings is positioned vertically on the left side of the board, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
Solder Board-Component View 6	 A photograph of a green printed circuit board (PCB) assembly, labeled 'Solder Board-Component View 6'. The board is populated with various electronic components, including a large black integrated circuit (IC) in the center, several smaller ICs, and surface-mount components. A white ribbon cable is connected to the left side of the board. The board is placed on a blue textured surface. A black ruler with white markings is positioned vertically on the left side of the board, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
