#### TROUBLE SHOOTING

If you start up the machine but it doesn't work, please check the following diagnosis.

Problems	Possible Reasons	Handling
No electricity, not working.	Power not connected.	Connect the power, press the button.
	Power wire broken burnt out.	Please contact local retailer.
	Battery may run out if you are using battery instead of USB power supply.	Connect the power, press the button.
Unable to spray mist or spray is bad.	Is the essential oil used up?	Refill the oil.
	Is the essential oil too sticky?	Change to non-sticky essential oil.
	Is the essential oil non-volatile?	Change to volatile essential oil.

**NOTE**

- Run time will vary depending on essential oil concentration and viscosity, humidity levels and other external factors.
- It is normal that spray may be invisible due to the light or environmental factors.
- It is recommended to use pure plant essential oil or volatile and non-sticky essential oil.
- Only use the charging cable supplied with the unit.
- Use a soft, moist cloth to clean the diffuser.
- Do not disassemble or remove any parts during the product operation.
- Essential oil should not come in contact with the exterior surface of the unit.
- Essential oil is corrosive, do not directly contact with skin or splash into eyes, mouth and nose.
- If the screw cap does not fit onto the essential oil bottle, or the bottle does not fit into the diffuser, the essential oil may be transferred into the empty bottle provided using a suitable funnel or eyedropper (not included). Take care not to spill the essential oil, as essential oils may cause damage to furniture or other surfaces.
- Diameter of Essential oil bottles25mm.
- Viscosity varies for different essential oil, which accounts different mist volume.

**FC** Model: AA18-02A

**Warning:** Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:  
(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:  
-- Reorient or relocate the receiving antenna.  
-- Increase the separation between the equipment and receiver.  
-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.  
-- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF exposure guidelines, the distance must be at least 20cm between the radiator and your body, and fully supported by the operating and installation configurations of the transmitter and its antenna(s).
