

# YZ-6B Multifunctional Clock Wireless Charging

## Product Operation Manual

### 1、Appearance Pictures

### 2、Input Power

- 2.1 Plug the USB end of the charging cable into the power adapter and the Type-C port into the product. The red charging indicator light will turn on.
- 2.2 The product enters the normal working state and enters the standby state after all the indicator lights light up. The default is 06:00.
- 2.3 The temperature detection starts to work and the temperature value is displayed.

### 3、Part

- 3.1 Output power: 15W
- 3.2 Indicator light display mode: Wireless charging indicator light: power on: blue light flashes, unplug power: no light;  
Charging indicator light: Charging: red light is always on; Fully charged: no light is on;
- 3.3 Product Parameters:  
Input: 5V/3A 9V/3A  
Wireless charging output power: 15W (MAX)  
Speaker power: 52MM 5W  
LED : 5050 Colorful 26pcs  
Charging efficiency: 75%

Wireless charging transmission distance:  $\leq 5\text{mm}$

Power Adapter: QC3.0,

#### 4、Bluetooth Speaker, Clock, Year And Date Settings:

4.1 Button function: 6 buttons       (The order from left to right is: power, mode, alarm clock, minus key, plus key, light key), When the operation is valid, there will be a sound (beep) at the same time.。

#### FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum 20cm distance between the radiator and your body: Use only the supplied antenna.
