No real-time image is displayed after the APP is started	Product Name	Ear Otoscope Model	Charging Time																																				
	Model		1h																																				
	Network Standard	IEEE 802.11b/g/n	Working Voltage																																				
	Working Frequency	2.4GHz	Rate Power																																				
	Image Transmission Rate	30fps	Lens Diameter																																				
	Image Sensor	CMOS	Best Focal Length																																				
	Environment Temperature	10-50Degree	Pixel																																				
	Unable to save pictures or videos to the phone	200mAh	Gravity Sensor																																				
	Be sure to allow the APP to access photos, media, and files on your device																																						
07	WARNING																																						
	<ol style="list-style-type: none"> 1. Please make sure your mobile phone is connected to "ShengLong-XXXX". Hand discomfort and eye inconsistency may occur when using this product for the first time. Improper operation may cause ear pain. Please wait for a moment and rest before operating. 2. Select Connect when prompted. The WLAN cannot access the Internet. If you select "Cancel" for the first time, you need to forget the "ShengLong-XXXX" WIFI network, then CONNECT again with this WIFI, continue to open the APP, and then select "CONNECT" to make it work properly. 3. Patients with ear canal inflammation can view the product through this visual function, but avoid using the ear harvesting function of the product to avoid injury. 4. Those without full civic capacity or lack of relevant experience and knowledge (including children) must use, clean and maintain the product under the supervision and guidance of the guardian as follows: <ol style="list-style-type: none"> 4. Close the APP and open it again. 5. Please try to turn on the phone data and then turn it off. 6. Do not use this product when taking a bath.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement.
