

Label Location

Room Hub ASM

P/N: 01030

1. Label Location

The regulatory label will be affixed to the back of the unit at the bottom right of the frame. The back of the unit is accessible by removing two screws and swinging the unit outward from the wall. The label is not placed on the front of the unit since it would obscure visual elements which are integral to the design. In addition, an electronic copy of the label will be made available via the touch screen interface.
