【Tips and Warnings】

In order to emphasize the important information of the user manual, special attention should be paid when seeing the label  , which indicates some important warnings and reminders.

【Safety Notice】

Read all instructions before installation. It is recommended that the machine be installed by a car audio professional.

 This machine is suitable for the vehicle 12V power supply system (the ground wire must be grounded), please do not install the machine in the 24V vehicle, otherwise it will damage the machine.

 Do not repair the power fuse without professional guidance. Improper use of the fuse can cause damage to the machine and cause a fire.

 To avoid violating traffic rules, drivers cannot watch videos while driving and operating machines to avoid unnecessary accidents.

 For the sake of safety and to ensure the normal use of the product, please invite professionals to install, disassemble or repair the machine to avoid machine damage and accidents.

 Please do not placing this product in a humid environment and water in case causing fire due to electric shock or other unnecessary damage.

**Note: To Prevent Burning The Machine, Do Not Turn On The Power
Until The Power Cord Is Properly Connected!**

【Test】

A quick simple test before the installation is to confirm that the device is working normally and as expected in case there is a wrong step in the subsequent installation, which will cause it to fail to work. If you perform a successful test but the unit did not work after installing it please recheck the

installation steps.

Test car stereo: ①The red and yellow wires of the car stereo combine together firstly and then connected to the positive pole of the 12V battery
②The black wire is connected to the negative pole of the battery.
③ Two seconds later, check the car stereo. If the screen is lighting up, it means the car stereo is properly functioning.

F133 Operation Manual

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
