

Instruction Manual

Chaozhou Xiangqiao Guangli Electronic Factory

*Model Number: A94T

*Switch: Touch Dimmer

Specification:

Light source: LED

Voltage: 110V 60Hz

Power: 0.6-1W

Lumen: 40-100Lm

The lumen count displayed for white light, warm light, and natural light color temperature is different

USB chargers: DC 5V 2A output for two ports, allows full speed charging for 2 smart phones or 1 tablet

Compatible with all 5V devices, such as iPhone,iPad,Android phone, other smart phone,tablet,camera,PSP ect.

FEATURES:

*Energy saving up to 90%

*Long life up to 8000HRS

*Low operating temperature

*High efficiency provides more light using less energy

Product Superiority:

1.2-Ports USB Charging Ports - 5V/2.1A*1 USB and 1 Type C night light charger allow you charge 2 devices simultaneously, built-in intelligent module will detect the device automatically to deliver the fastest possible charge speed.

Charge function and night light function is independent night light can be used without charge

2.LED Night Light With touch Switch - It has dimmer function, BRIGHTNESS from dark to light , can be converted according to your own needs.

CAUTION:

*Always switch off power socket when not in use for a long time

*For indoor use only

*It is not a toy for children

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
