How to connect the remote control Bluetooth?

Press any button on the remote control and the blue light will flash > >

Turn on the Bluetooth of your device (mobile phone, tablet, iPad) > >

Search for Bluetooth device **TIK006** > > Click to connect the device > >

Finish the Bluetooth connection.

The indicator light of the remote control is blinking green, which means the connection is successful.

When. using Android and HarmonyOS phones,it can be used by connecting to Bluetooth.

With Apple (iOS) you need to switch on "AssistiveTouch and ZOOM" in addition to the Bluetooth connection. Please check the following steps for details on how to use it;

1. First make sure that the system software (iOS) of the iPhone or iPad is higher than 14.8;

2. The AssistiveTouch function must be turned on, as shown in the figures on the right:

After AssistiveTouch is turned on, 2 dots will appear, the large one can be dragged, and the small one cannot be dragged. When the video is not swiped,it will disappear after 30 seconds. Android and HarmonyOS phones donot have these two dots.

3. The ZOOM function must be turned on;

Please note that the display ratio of your Zoom phone is enlarged when it is switched on. Tap the screen twice with three fingers to restore the normal screen size.

4. If the previous items 1/2/3 have been completed,but the video stillcannot slide up and down normally or can only be paused by pressing the button, Please turn off iPhone or iPad Bluetooth and then reconnect Bluetooth.

How to turn on “AssistiveTouch” in phone settings

Go to your phone's settings page → open Accessibility → Touch → AssistiveTouch (Please see the chart below)

How to turn on “ZOOM” in phone settings

Go to your phone's settings page → open Accessibility → ZOOM
(Please see the chart below)

Q&A

Q1: Can I take photos and videos on "TikTok APP"?

A: Not supported.

Q2: Can I shoot directly by clicking the remote control shooting button?

A: Not supported

You need to enter the cell phone or tablet shooting page app in advance, and then use the remote control to shoot remotely.

Q3: What should I do if I turn on Touch on my Apple phone or iPad and still can't swipe up and down and "like" the video?

A: Turn off Bluetooth and reconnect

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Information

The device has been evaluated to meet general RF exposure requirement.

The device can be used in portable exposure condition, compliance with exposure requirements.
