

T97 Bluetooth Headset User Manual

TWS headset function introduction

A:Headset pairing

1. Headset pairing, take the headset out of the watch host, there is a boot tone, open the Bluetooth in the mobile phone settings, find the corresponding Bluetooth name T97-R/T97-L for Bluetooth connection, the factory has been good between the TWS headset pairing. Only the Bluetooth name T97-R/T97-L is displayed, and the mobile phone has seen connected, which means the product has been connected successfully.
2. Remove the headset from the main body of the watch will be automatically switched on and automatically paired with the connection.
3. If the headset is disconnected from the mobile phone or the headset is not connected during use, the mobile phone needs to be reconnected to Bluetooth. In the Bluetooth under the mobile phone settings, there is a Bluetooth model that has been connected before, please clear it first, and then search for Bluetooth T97-R/T97-L to connect.

4. Headset pairing: If only one side of the headset has sound, then you need to pair the headset to each other.

Pairing operation method between headphones:

1. Firstly, press and hold both headphones for 6 seconds to switch off the power.
2. Long press the two headphones at the same time to switch on, switch on the two headphones light alternately flashing state (at this time to keep your hand on the headset touch point is not moving), press the two headphones at the same time 7 times, press the end of the 7 times after the two headphones will be automatically switched off at the same time.
3. Put the two headphones into the watch compartment and take out the two headphones at the same time, only one of the headphone light is on after switching on the watch. Only one of the headset lights up when the watch is switched on, which means the pairing of the headset is successful.

B: The middle surface of the headset is a touch surface, which is used to touch control answer/hang up the phone, control music up/down, volume up/down, AI voice assistant.
