10. TWS Earphone Features
earphone Pairing
1.earphone pairing, take the earphone out of the watch host, there is a boot tone, open the bluetooth in the mobile phone settings, find the corresponding bluetooth name T96-R/T96-L for bluetooth connection, factory before TWS earphone has been done between the pairing pair. Only the Bluetooth name T96-R/T96-L is displayed, and the mobile phone sees that it has been connected, which means that the product has been successfully connected.

2, It is not recommended to wear them while taking a hot bath.

The first factor: Hot bath will generate steam, due to the high temperature of the bath water, it is easy to generate a lot of steam. Steam is a gas with a small molecular radius, so it can easily penetrate the gaps in the smartwatch case. When the temperature drops, the water will gradually condense into water droplets, which can damage to the circuit board and thus damage the smartwatch.

3, When connecting Bluetooth, make sure the Bluetooth of your mobile phone and smartwatch is turned on. Make sure your smartwatch is not connected to another account when doing a Bluetooth search. Place your smartwatch and mobile phone as close as possible when doing a Bluetooth search.

4, If the user's mobile phone installed other software, such as mobile phone manager, in order to ensure the normal operation of the background APP, please open the mobile phone's message push and allow the background operation, otherwise it can not be pushed messages

5,To ensure the accuracy of the test data, after entering the blood oxygen test mode, remain relaxed and still during the test and make sure the smartwatch and your heart are at the same height. Please do not talk during the test. (This function provides data reference for blood oxygen changes before and after human exercise, and cannot be used for medical purposes)

12. Warnings

This product is not a medical device. The smartwatch and its app cannot be used for the diagnosis, treatment or preventive treatment. Please consult a medical professional before changing your exercise and sleep habits to avoid serious injury. The manufacturer reserves the right to modify and improve the functional descriptions of the user guide and to update the content at any time without notice. This user guide is for informational purposes only. This user guide is for informational purposes only, and the smartwatch should be subject to the final product.

3,Turn on message push in app settings

4,Whether the Bluetooth of the mobile phone has been turned on, and whether the mobile phone and the watch are connected properly

5,Weather data is regularly updated by the APP in the background of the phone via a server and then synchronised to the watch.

6,Please make sure the network connection is normal. Weather data provided by the server or different from other platform weather data

7,The update and upgrade of the data server may cause data synchronisation problems, please wait patiently for the completion of the upgrade according to the announcement on the APP.

8,The main thing on APP is to record and store the data, some functions cannot be operated and modified.

9,The time on the watch is synchronised via the mobile phone connection and cannot be changed

Q:Watch use jams

A:1.The watch battery may be too low and needs to be recharged

2,The distance between the phone and the watch is too long or there is an obstacle in between.

3,There are too many Bluetooth devices connected or have been connected to the phone. It is recommended that the number of Bluetooth devices connected previously connected not exceed 10.

4,Please use Restore Factory Settings with caution. Restoring Factory Settings will result in the loss of all APP content settings and watch history data.
