

<h3>Smart Device Manual</h3>  <p>Equipment maintenance</p> <ul style="list-style-type: none"> Do not scratch the display screen and sensor of the device to protect it from damage. You can wipe the surface of the device with a damp cloth and use mild soapy water to remove grease or dust. Do not expose the device to an environment with strong chemicals, such as gasoline, cleaning solvents, propane, alcohol or insect repellents, which can damage the sealing and shell surface of the device. Avoid your device from suffering strong impacts and extremely high-temperature exposure. Only when the lens and shell are intact is it waterproof. After violent disassembly and assembly, the waterproof property will be affected. Do not immerse the device in hot water, sea water, chemical reagents. Please use the original charging cable of the product to charge the device. Note: This equipment is not a medical device, and the data and information provided are for reference only. 	<p>FCC Warning</p> <p>This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.</p> <p>NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:</p> <ul style="list-style-type: none"> - Reorient or relocate the receiving antenna. - Increase the separation between the equipment and receiver. - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. - Consult the dealer or an experienced radio/TV technician for help. <p>NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.</p> <p>The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.</p>	<p>EN APP Download</p> <ul style="list-style-type: none"> Scan: Scan the QR code to download and install the application Android: Search for "Keep Health" through Google Play to download and install the application Apple: Search for "Keep Health" through the App store to download and install the application <p>Preparation before Use</p> <p>For the first use, please long press the touch button to power on.
