

Device Overview

How to use the Smart Scale

1. Place the scale near where you finish packing orders or seal the bag before handing off orders to Dashers.
2. Weighing the order should be the last step once it’s all packed up.
3. Before you seal the bag, select the order on the tablet and weigh the order to confirm it is correct.
4. If something is thought to be missing, double-check the contents of the bag and re-weigh the order once you have added the item.
5. When the scale has confirmed the weight of the order, the order will be marked as ready for pickup.

FCC Statement

FCC ID: 2BFSLS5
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate this equipment.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Radiation Exposure Statement

The device has been evaluated to meet general RF exposure requirements. To maintain compliance with RF exposure requirement, use a product that maintains a 20cm distance between the device and human body.

QUICK START GUIDE

A 12 x 16 inch smart scale built for commercial kitchens.

Included In This Box

- Smart Scale
- Top Plate of Smart Scale
- Rhino T80 with Case and Stand
- Hub with Captive Fastener
- 2 Black USB Type-C Cables
- 1 Type-A to Type-C Cable
- 1 Power Adapter
- 1 L Key

Unboxing the Smart Scale

- 1. Remove all the components from the box.
- 2. Place the scale with its flat surface facing down on a stable surface. Plug the right angle Type-C end of the long black cable into the bottom of the scale. Connect the other end of this cord to the tablet in a future step.

- 3. Place the tablet with the flat side on a clean and stable surface. Open the stand to an upright position to gain access to the hub slot.

- 4. Slide the hub into the slot available at the back of the tablet in a top-down direction. Once locked in place, use the L-Key provided to tighten the captive fastener and secure the hub.

- 5. Turn the tablet and stand over such that “This side up, Insert this way” is facing you. Now, slowly slide the stand into the slot available at the bottom of the scale. **Note:** You can choose the short side or long side slot based on your requirements.

- 6. Press and hold the power button of the tablet for 4 seconds until the device turns on and vibrates. When you see the lock screen with the time and date, swipe up on the screen.
- 7. The hub has 3 USB Type-C ports:
 - a. Connect the Type-C end of the cable to the bottom of the hub and the Type-A end of the cable into the adapter. Connect the adapter into an available mains outlet. The LED indicator on the hub will turn Green once connected to a power source. For best performance, ensure the device is always plugged in.
 - b. Connect one end of the Type-C black cable to the left USB port of the hub, and the other end into the tablet’s USB port. Check the tablet, the charging icon should be visible on the screen.
 - c. Insert the other end of the Type-C cable from Step 2 into the right USB port of the hub.

c.

- 8. Once you have connected all the cables, adjust the tablet to a comfortable viewing angle.
- 9. Place the top plate on the scale to complete the assembly. The scale will automatically update to the latest software. **Note:** While that’s happening, make sure that no items are touching the scale, and it’s pulled slightly back from any walls to ensure accurate measurements are made.
- 10. Press **Calibrate**. With that, your smart scale is all set and ready to use
