

# Wireless Mouse

## User guide

### Specifications

- Sensor: Optical
- DPI: 1000-1200-1600dpi
- Number of keys: 5
- Key life: Around 3 million times
- Response 125Hz
- Battery : 3.7V-400mAh

### Why does it fail to connect

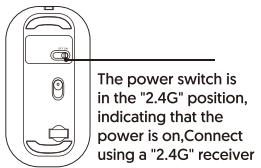

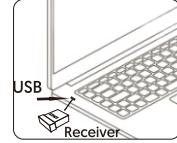

When the device fails to connect, please check the following questions:

1. Check the integrity of the connector ;
2. Check the connection to the device ;
3. Check your device settings ;
4. Check the battery level ;
5. Disconnect and reconnect the device;

### How to connect to 2.4G mode

1. Turn on computer.
2. Take out the receiver at the bottom of the mouse and **insert it into the computer USB port**.
3. Turn the "BT/OFF/2.4G" switch at the bottom of the mouse to the **2.4G position**.

#### Receiver plugged into computer

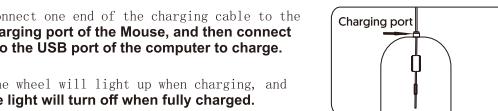

The power switch is in the "2.4G" position, indicating that the power is on. Connect using a "2.4G" receiver

### Charging operation instruction

1. Connect one end of the charging cable to the **charging port of the Mouse**, and then connect it to the **USB port of the computer** to charge.

2. The wheel will light up when charging, and the light will turn off when fully charged.

**Note: Do not use a fast charging adapter to charge directly!**

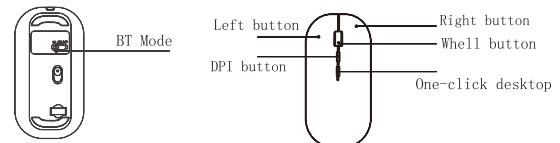

### How to connect the mouse to bluetooth

1. Turn the "BT/OFF/2.4G" switch at the bottom of the mouse to the "BT" position, the blue light on the mouse wheel will flash, waiting for the pairing connection.

(during pairing, the blue light on the wheel will flash continuously, and the blue light off after the connection is successful. If the blue light does not flash, long press the "DPI" button for 3-5 seconds, the blue light on the wheel will flash continuously, entering the pairing mode)

2. Turn on the BT device, search for the mouse Bluetooth name "BT5.0-MOUSE", click "BT5.0-MOUSE" to connect it.

### "DPI" BT pairing code

Long press the "DPI" button for 3-5 seconds and then let go, the blue indicator light on the scroll wheel flashes, you can connect

### FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:  
(1) This device may not cause harmful interference, and  
(2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio

frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help. The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
