

Model:M9
3-IN-1 Wireless Charger(Foldable)
User Manual

I . Product Description

This device is a 3-in-1 foldable charger which can support power charging for mobile phone/iWatch/airpods. The right design is special and more practical. It has a unique folding design. The folding method of the product is more convenient for storage and carrying. It can charge multiple devices at the same time that the user can charge the mobile phone and iWatch at the same time. You can also charge the phone vertically or horizontally without affecting the charging of the phone, and you can rotate the iWatch for better viewing while charging.

V . FCC Warning

Caution: FCC ID: 2ABD8 and IC: 2473H

Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, the user is encouraged to try to correct the interference by one or more of the following measures:

- Increase the separation between the equipment and receiver.
- Connect the equipment into a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

For more information, please visit www.fcc.gov or www.ic.gov. This equipment should be installed and operated with a minimum distance of 12" between the device and your body.
