Usage environment	0-40°C	0-40°C
Remote control distance	5-10m	5-10m

Cleaning, safety and storage

You can wash the silica gel with warm water and antibacterial soap, rinse with clean hot water, and pat dry with a lint free cloth or towel. Do not use detergents containing alcohol, gasoline or acetone. Keep the equipment away from direct sunlight and extreme high temperature. Store the equipment in a dust-free place.

Attention

This is a personal massager, not a medical device. Do not massage open wounds or around the chest. If you feel serious discomfort during the massage, stop using and consult your doctor. Do not use a massage stick when charging. When charging, please gently insert the DC plug into the port.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
