## Introduction:

Boxing is a combat sport in which two opponents of equal size and ability cover their fists with gloves, fighting each other, it is both usually used to train the speed and strength of the players during amateur and a professional sport. In boxing, boxing targets are boxing training. Since the opponent's gap in boxing matches is short, speed is more important than strength training. Hand offensive and defensive reflexes, the product uses electronically controlled light guidance to train people's ability to respond by sound signals to accurately hit the target point, thus efficient forging exercise overall coordination and sensitivity.

## Technical Data:

Input: DC 5V Power: 5W Working Voltage: 3.7V

Carton: 41\*44\*3.5 cm N.W./G.W.: 2 kg/2.5 kg

Battery: 2000mA

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

#### FCC Radiation Exposure statement

The device has been evaluatec to mee general RF exposure requirement. The device can be used in portable exposure condition without restriction.
