Product Description

product parameters

Product name: VRing

ring Product model: VR11001-13

Battery Type:Rechargeable Polymer Hammer Battery

Battery capacity: 14. SmAh - 21. SmAh (depending on the size of the ring)

Charging time:<2 hours

Duration:7~10 days

Rated input of charging box: 5V—1A

Bluetooth version: BLE5.0

Device requirements: only supporting paired Android 5.0 or iOS 10.0 and above device

Data storage: 15day

Product executive standard: GB4943.1-2022 《Audio-visual, information and communications technology equipment-part 1: Safety requirements》

Maximum exercise time: 99 hours and 59 minutes

calorie consumption: 999.9 kcal

kcalMaximum exercise distance: 999.99KM

Operating temperature range: -10-50 °C

CMIIT ID: 2023DP15910

APP function introduction

Heart rate

- 24-hour automatic measurement (adjustable automatic interval)
- daily / weekly / monthly heart rate reports
- APP initiates manual measurement at any time

Oximetry

- 24-hour automatic measurement (adjustable automatic interval)
- daily/weekly/monthly oximetry reports
- APP initiates manual measurement at any time

Sleep

Automatic sleep monitoring, recording sleep data including sporadic naps, wakefulness, REM sleep and deep sleep

- Sleep Profile, Calculate Sleep Duration, Sleep Efficiency, Time to Sleep, Sleep Quality Daily / Weekly / Monthly Sleep Report

noninvasive glucose

trend assessment

- Based on AI artificial intelligence algorithm, combined with the builtin high-performance sensor of the ring, continuously collect and monitor the physical sign data under different states of the body, and comprehensively assess and predict your blood sugar risk
- Daily/weekly/monthly activity report APP initiates manual measurement of

Heart rate variability

- 24-hour automatic measurement (adjustable automatic interval)
- Daily / Weekly / Monthly Heart Rate Variability Report

Activities

- All-day step, distance, and calorie tracking
- daily / weekly / monthly activity reports
- Personalized goal setting to track your daily achievements
- (a) Maximum oxygen uptake measurements during exercise to assess progress in exercise capacity and endurance
- daily / weekly / monthly activity reports
- APP initiates manual measurement at any time

Stress

24-hour automatic measurement (adjustable automatic interval)

- daily/weekly/monthly stress reports

changes in body temperature

24-hour automatic measurement

- Daily / Weekly / Monthly Temperature Trend Report

Troubleshooting

If the ring cannot be paired with the cell phone

1. Make sure the ring is on.
2. Check your cell phone to make sure Bluetooth is turned on.
3. Check whether the Bluetooth permission of the APP is on , which can be queried in the Bluetooth settings of the mobile phone.
4. Make sure that the distance between the cell phone and the ring is within the range of a valid connection.

safety and precautions

Before using and operating the equipment, please read and observe the following precautions to ensure that the ring contact area is kept dry for optimum performance and to avoid hazardous or illegal conditions.

- 24-hour automatic measurement (adjustable automatic interval)

Initial use

Please choose a ring size that fits your finger to avoid wearing it too tightly; If you have not worn similar products before, it may take some time to get used to them. If symptoms such as redness and swelling appear on the wearing area, discontinue use immediately and consult a physician.

Daily use

- When wearing the ring, make sure that the ring sensor is facing the palm side of the finger for better measurement results.
- When choosing to measure heart rate or blood oxygen manually, please try to stay as still as possible to obtain more accurate measurement data.
- If the ring gets stuck when you try to remove it, try wetting your finger with cold water and mild soap and slowly turning the ring to remove it.

radio safety warnings

In medical or other places where the use of wireless devices is prohibited, observe the rules of the place and turn off the device.

- The radio waves generated by the device may affect the normal operation of implanted medical devices or personal medical equipment, such as pacemakers, cochlear implants hearing aids, etc. If you are using such medical equipment, please consult with the manufacturer of such equipment for restrictions on the use of this device.

child safety warnings

This product and its accessories may contain some small parts, please keep this equipment and accessories out of the reach of children, to prevent children from swallowing small parts, otherwise it may cause injury. This product is not a toy and should be used by children under adult supervision.

battery safety warning

This device is equipped with a non-removable internal battery, please do not replace the battery yourself to avoid damage to the battery or the device.

- Do not disassemble or modify the battery, insert foreign objects, or immerse it in water or other liquids, as this may cause the battery to leak, overheat, catch fire or explode.
- Do not drop, crush or puncture the battery. Avoid subjecting the battery to large external pressures that could cause internal short circuits and overheating.
- Do not dispose of this unit and its accessories as ordinary household waste.
- Please comply with local laws and regulations regarding the disposal of this equipment and its accessories, and support recycling initiatives

charging safety warning

Please keep the charging case and the device in a dry environment when charging, do not touch the charging case with wet hands, otherwise it may cause a short circuit.

- When charging, do not touch the power supply with wet hands as this may cause injury.

accessory requirements

- Please use the charging case supplied with this device to charge your ring.
- The charging case supplied with this unit may not be used for charging other products.
- Please use a power adapter that meets CCC certification.

cleaning and maintenance

Wipe the unit or its accessories with a clean, dry, soft cloth.

- Do not use external heating devices such as microwave ovens or hair dryers to dry them.
- Do not use harsh chemicals, detergents or other corrosive chemicals to clean the equipment or its accessories as this may cause damage to the product.
- Before cleaning and servicing the unit, stop using the unit ,turn off all applications and disconnect all connections or cables to other equipment.

Operating and storage environmental requirements

- Use the device within the temperature range of 0 °C to 35 °C and at temperatures of -5 °C to 50 °C. The device may malfunction when the ambient temperature is too high or too low. When the ambient temperature is too high or too low, it may cause the device to malfunction. When the temperature is lower than 5°C, the performance of the battery will be limited.
- Do not place the unit in direct sunlight, such as the dashboard of a car or on a window sill.
- Do not place the appliance near sources of heat or naked flames, such as electric heaters, microwave ovens, hot water heaters, stoves, candles, or other places where high temperatures may be generated.
- Do not use the equipment near magnetic fields, as this may cause the equipment circuit to malfunction.
- Do not use this equipment during thunderstorms, as this may cause equipment malfunction or risk of electric shock.
- Do not leave your magnetic stripe card (e.g. bank card, phone card, etc.) in contact with the device for a long period of time, as this may cause the magnetic stripe card to become invalid.

Electronic information products toxic and harmful substances declaration

Part name	An element of a poisonous or noxious substance					
	Pb	(Hg)	(Cd)	(Cr6+)	(PBB)	(PBDE)
The shell	○	○	○	○	○	○
Inner Shell	○	○	○	○	○	○
Circuit board	○	○	○	○	○	○

FCC Requirement

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation

. Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator & your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
