Explanation: After deleting the device, the device will emit a beep sound and the indicator light will flash 6 times. The device will not shut down and is in pairing mode. If there is no re-pairing within 10 minutes, the device will leave the pairing state and cannot pair with the App. If you need to pair devices, you need to click the device button once, the device will sound, and the light will flash once. At this point, the device enters pairing mode and can be re-paired with the App.

Main functions of the product

1. "Find My" network location

When the device exceeds the Bluetooth distance from the phone, the device cannot be linked in the "Find My" App. You can choose: Lost Mode, choose: Enable. Enter your contact phone number, etc. If the device is disconnected from your phone for more than a period of time and there are other iPhone near the device, you will receive notifications and the latest location in your "Find My" App.

2. Play sound

When the phone and device are within Bluetooth range (usually around 20 meters), click "play sound" in "Find My"App, and the device will emit music to help you quickly find nearby items.

Instructions for using device buttons

1. Equipment startup

After installing the battery, press the button for five seconds, the device will sound, the light will flash three times, and the device will turn on.

2. Equipment status confirmation

Double click the device button twice, the device will sound and the light will flash three times, indicating that the device is working. If the device does not sound, it indicates that the device is in a shutdown state. Press the button for five seconds to turn on the device.

3. The device enters pairing mode again

After deleting the device, the device will emit a beep and the indicator light will flash 6 times. The device will not shut down and is in pairing mode. If there is no re-pairing within 10 minutes, the device will leave the pairing state and cannot pair with the App. If you need to pair devices, you need to click the device button once, the device will sound, and the light will flash once. At this point, the device enters pairing mode and can be re-paired with the App.

4. Restore factory settings

Firstly, remove the device in the "Find My" App. Then, after the device is turned on, double-click the device button and the device will sound. Immediately press the device button for about eight seconds until the device emits a prompt sound and the indicator light flashes three times. Release the button and the factory settings are restored. The device can be paired with a new account.

5. Shutdown

When the device is turned on, press the device button 5 times continuously within 2 seconds, the device emits a prompt sound and the indicator light flashes three times, and the device enters a shutdown state.

Frequently asked questions

1. When can the device be located by other Apple phones?

When the device is disconnected from the owner's Apple phone for a period of time, the device can start being located by other Apple phones, and the owner can start to obtain the location of the device.

2. How to confirm if the device is turned on?

Please double-click the device button twice, the device will sound and the light will flash three times, indicating that the device is working. If the device does not sound, it indicates that the device is in a shutdown state. Please press the button for five seconds to turn on the device.

3. How to prevent devices from being used for malicious tracking?

When someone else's device mixes with your personal belongings and tracks them for a period of time, you will be reminded in the following two ways:

(1) If you have an iPhone, iPad, or iPod touch or other Apple device, you will receive a reminder on the Apple device; This feature is available on iOS or iPadOS 14.5 and later versions of Apple devices.

(2) When you don't have an Apple device, if someone else's Nutale Air leaves its owner and tracks you for a period of time, it will emit music to remind you when it moves. Of course, if your friends happen to be carrying the device, or if many people on the subway you are taking have this device, there is no need to worry. Because as long as the device does not leave the owner's side, such a reminder will not be triggered.

4. How to protect my privacy?

Where is your device, only you can see it yourself. Your location data and history will never be stored on Apple and Nutale servers. The device that transmits your device's location data always remains anonymous, and the location data is encrypted and protected at every step of the search. Therefore, both Apple and Nutale are unaware of the location of your device and the identity of the device that helped locate it.

5. How to charge the device?

1) Connect the wireless charger to the power supply.
2) Place the magnetic attaching surface of the product on the charger.

🔴 Red status: charging in progress
🟢 Green status: fully charged

6. What is the "Find My" network? How does it work?

The Apple Find My network provides a simple and secure way to find compatible personal items on maps by using the Find My application on iPhone, iPad, iPod touch, Mac, or Find Items of Apple Watch. Simply pair your compatible product with the Apple "Find My" App to view it together with your Apple device. If your item is lost, you can put it in lost mode to display messages and contact information to anyone who may have found it. The Find My network is encrypted and anonymous, so no one else, even Apple or Nutale, can view its location.

Important reminder

When pairing the device with the "Find My" App, it is necessary to connect to the Apple server. If pairing is not possible, it is usually because you are using the

The network is temporarily unable to connect to the Apple server. We suggest the following actions:

1. Change mobile network, such as switching between WIFI and mobile network;
2. To restore the device to its factory settings: After the device is turned on, double-click the device button, and the device will sound. Immediately, press the device button for about 8 seconds until the device emits a second prompt sound and the indicator light flashes. Release the button. Factory reset completed. (Note: After long pressing the device button for 2 seconds, the device will make a "beep, beep, beep" sound, and the indicator light near the button will flash. Do not release it, continue to press the button until the device emits a music prompt sound for the second time, and the indicator light near the button will flash. Release the button).
3. Re-pairing with the "Find My" App.
