

WIFI video chat camera Quick start guide

Step 1 Download APP
Tips one: Scan QR code.

Step 2 Power on
Powered on camera, it will make a voice "system starting up, wait be configured" after several seconds, you can make the camera pair network. If the camera does not make the voice for long time, please long-press the camera reset button to restore factory settings.

Note:
If you need local storage, please install the TF card firstly, then power on the device (the TF card does not support hot swapping, please plug and unplug the TF card when the camera is powered off). Cloud storage is recommended, which is safe and convenient. Details See "Step 4" for operation.

Step 3 Configure the network of the camera
1. Connect your phone to Wi-Fi network and turn on Bluetooth.
2. Open the iCSee app, register an account and login(Figure 1).
3. After successful login, click the "+" button (Figure 2).
4. Wait for the device to be added to be found, and click "OK" (Figure 3).
5. Enter the Wi-Fi password and click "OK" (Figure 4).
6. Wait for the camera network configuration, when the camera issues a "connect successfully" voice prompt, indicating that the network configuration is successful(Figure 5).
7. After the network configuration is successful, set the camera name(Figure 6).
8. After the configuration is completed, the device is displayed in [Smart Device]. Click to open the real-time preview screen, and do some settings as you want(Figure 7).
