USER MANUAL

Note:

Function of the Power Button If you insert an unformatted card, the camera will prompt you of formatting it. You can press this button once to format it

Press and hold the power button for 4 seconds until you hear a beep from the camera to power off the dash camera. Press and hold the power button for 8 seconds until you hear another 2 beeps from the camera to restore the camera to factory settings,

Under videa recording status, short press is to lock the video,

1. Connect the Dash Camera with the App

Step1

Scan the QR code below or go to Google Play/App Store to search for "Viidure or VeeCar" to download and install the App on your mobile device.

Note:

For Android mobile phones,we recommend that you search for"Viidure or VeeCar" in Google Play to download and install the APP. If you scan the QR code directly to install, you may receive a security warning from the app.This is a verification warning that comes with the Android system, and the iOS system will not have this problem.

Step 2

Make sure the dash camera is powered on and the distance
between your mobile device and the camera is within 5 meters,

Step 3

(Launch the "Viidure or VeeCar" App and grant the permissions required by the App (Option to skip the login or registration process first), then tap Add Camera to check the wizard and start connecting.)

Step 4

Go to the Settings > WLAN of your moblle device to search
for WiFi of "FH Can-*"*** " and enter the password 12345678 to connect to
the camera's hatspot.

Tips:

After connecting to the camera's WiFL,if your moble device pops up a window asking "The camera's WFi can't access the Internet, are you sie to continue the connection?",pleaoe select "Yes".Selecting "No' will disconnect the camera's WiFi

Step 5

Go back to the App to wait for the connection, then tap Access Camera to enter the homepage.

Set the frame rate of the video. After enabling this option, every 30 minutes of videos will be compressed to 1 minute and then be saved in the memory card. Note:

An extra hardwire kit(not included) is required for using this function. Please contact us for more information.

Wi-Fi Name

Check and change the camera's WiFi name.

Wi-Fi Password

Check and change the camera's WiFi password.

Firmware Version

Check the firmware version of the dash camera.

Format

Format the memory card.

Default

Restore the dash camera to the factory settings. When resetting, the dash camera will be restarted.

TROUBLESHOOTING GUIDE

Q1. The dash camera can't be used normally after the new sd card is inserted, and it prompts that the card needs to be formatted.

To ensure normal video recording with the dash camera, it needs to format the memory card first and check its speed before using it. Option 1: Press the power button as soon as you hear the voice prompt for formatting the memory card.

Option 2: Go to the App>Settings >Format to format the memory card.

Q2. Too loud, too low, or repeated voice prompts.

Go to the App> Settings> Speaker Volume to mute the speaker or adjust the volume as needed.

Q3. My mobile device can't connect to the dash camera's WiFi. Go to the WLAN settings of your mobile device and find the WiFi of FHcam-******.Then, input the right password 12345678. After a successful connection, the WiFi icon on the display will turn green. Upon the success of the first connection, the mobile phone will automatically connect for future use.

Q4. There is no sound when playing the recorded videos.

If the microphone icon on the display has been disenabled 2, the video has been recorded without sound. To turn on the microphone, please go to the App> Settings>Record Audio.

If the microphone icon on the display is normal 0, please go to App> Settings > Default and restore the dash camera to factory settings. (It's normal for preview video to be without audio.)

Note:

In case the problem persists after resetting, please contact us directly.

Q5.The machine sometimes sends out a voice reminder of "The video is locked", is it normal?

The voice reminder indicates that the current video is being locked and recorded. It is a normal situation that the G-snsor function is triggered due to sudden braking, collision or bad road conditions during the driving process. You can go to App> Settings> G-sensor to adjust the sensitivity level or disable this function.

Q6. Why can't I see the live preview on the App?

1. Make sure your mobile device has connected to the WiFi of the dash camera.

2. The distance between your mobile device and the dash camera can't exceed 5 meters.

Q7. Why can't my mobile device receive messages via 4G/5G cellular data after it connects to the WiFi of the dash camera? If your mobile device is a single-channel phone, it will not be able to receive 4G/5G information after connecting to the camera's WiFi. However, it will be able to receive calls.

Q8. How to mute the sound of the dash camera?

After connecting to the camera's WiFi, please go to App > Settings> Speaker Volume to mute the speaker.

Q9. Can I use the dash camera without a power source?

No, you can't. Since this camera has no battery built-in, it needs to be powered while working.

Q10. Can I use the dash camera without my phone?

Yes, you can. Once you set up the dash camera with the App for the first time, as soon as the dash camera is connected to the power supply in the future, it will begin working.

Q11. How can I activate the Parking Mode function of the dash camera?

A hardwire kit is required to use this function. After the Hardwire Kit installation and wiring are completed correctly, the machine has activated the "Time-laspe" function by default, and the dash camera can guarantee 24H continuous time-laspe recording to ensure the safety of your car.

Q12. When I cannot connect to the camera's WiFi, my mobile phone can't recognize the WiFi, the camera's WiFi is not listed, I can't format the card, and I can't find the unconnected device, what should I do?

Please press and hold the power button for 10s until you hear two beeps to restore the dash camera to the factory settings. After resetting, please reconnect your mobile device to the

camera's WiFi. If the issue still exists, please directly contact us.
