# Important Read before use

1. UniWhale Smart Baby Care is not a medical device and do not have the purpose or function of diagnosis, prevention or monitoring in medical practice. If you have any health concerns or questions, please consult a medical professional.
2. 「Smart Baby Tag」 needs to be used in conjunction with 「Smart Care Station」 and 「UniWhale APP」 .
3. The 「Smart Care Station」 can only be used in conjunction with the 「Smart Baby Tag」 .
4. This product is only suitable for healthy infants and young children aged 0~5 years old and needs to be used correctly with standard accessories for different ages.
5. This device is not intended to provide use by users (including children) with insufficient physiological, perceptual, mental capacity, experience or knowledge.
6. Before use, please confirm that the patch has sufficient power, and wear and use it correctly according to the instructions in this user manual to achieve the most accurate and safe measurement effect. as :
  - i. Before the patch is clamped into the diaper, fold the diaper tip outwards so that the product can grip the diaper tightly, or use a toddler/belly circumference to attach the sensor end to your baby's belly.
  - ii. Choose the right size diaper for your baby and adjust the tightness of the diaper to fit your baby's shape. If the diaper is too loose, the patch may not be able to touch the baby's skin.
  - iii. If the diaper is not easy to hold the patch stably, it is recommended to purchase additional baby strap accessories, which can assist in more properly attaching the sensor end to the baby's skin.

# Important Read before use

6. This product is designed to be water-repellent and can be wiped clean with alcohol (or water, mild detergent). It is forbidden to soak in water or rinse this product directly, as liquid penetration will cause damage to the sensor in the patch.
7. This product is suitable for storage in the temperature range of -20°C ~ 60°C (-4°F ~ 140°F), and the operation should be placed in an environment below 10°C ~ 35°C (50°F ~ 95°F).
8. If the product is damaged (such as the appearance of the patch is damaged), please stop using it immediately to avoid risk during use.
9. The Smart Care Station and the Smart Baby Patch must be placed in the same open space and the distance between the two should not exceed 5 meters.
10. The USB type-C power cable must be prevented from being handled by children and should be kept at least 0.9 meters away from the crib to avoid the risk of suffocation around the neck.
11. If you notice any discomfort (e.g. redness, swelling, itchiness, etc.), remove the patch immediately and stop using it, consult a medical professional or seek medical attention immediately.
12. Do not attempt to disassemble or reassemble this product yourself.
13. Contains lithium batteries, and discarded components must be recycled or discarded after proper disposal to avoid environmental pollution.
14. To avoid the risk of accidental ingestion, remove the protective film and sticker from the patch.
15. Charge at least once every 30 days to protect the life of the lithium battery

# Other precautions

- For your safety, please follow the instructions and precautions in full compliance.
- Do not dispose of the unit in fire or expose it to sunlight for long periods of time.
- Please avoid sudden changes in temperature and humidity.
- Do not use in a humid environment.
- Waste components must be recycled or discarded after proper disposal to avoid environmental pollution.
- The applicable altitude of this product is 0~1500 meters above sea level.
- If you have any questions, please contact our customer service mailbox [support@uni-whale.com](mailto:support@uni-whale.com).

# Part I: Introduction

# 1. Smart Baby Tag

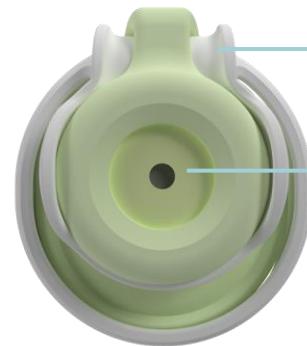

Sensing probes

Since the sensor probe must fit snugly against your baby's skin, it is important to keep the probe clean and clean when using it.

The white side is facing up when charging

When the patch is charging, place the white upper cover facing up.

Buckles

The probe is facing outward

When placing the patch in the buckle, please note that the probe must be facing outward in order to place it correctly.

<b>Power supply</b>	DC 5V 1A (The product does NOT come with a power supply!)	<b>Self-Check</b>	Automatically Self-Check microphone of Smart Baby Tag
<b>The main material</b>	Polycarbonate(compliant with RoHS/ REACH)	<b>Lighting indications</b>	Notification / Charging / Nearby Tag Detection
<b>App Compatibility</b>	iPhone 7 or later (iOS 8.0 or later), Android 5.0 or later.	<b>Warning / Soothing Tone</b>	play notification tone. Play built-in contextual soothing music.
<b>Dimensions</b>	110mm X 85mm X 27mm	<b>Reset</b>	Factory Reset

## Part II: Setup

# 1. Charging

Connect the USB-C charging port of the Smart Care Station to the power cable. (The charging cable must be TYPE A on one end and TYPE C on the other).

Place Smart Tag as the left picture shown.

For the first time to use Smart Baby Tag, please place the patch in Smart Care Station to charge for at least 10 minutes.

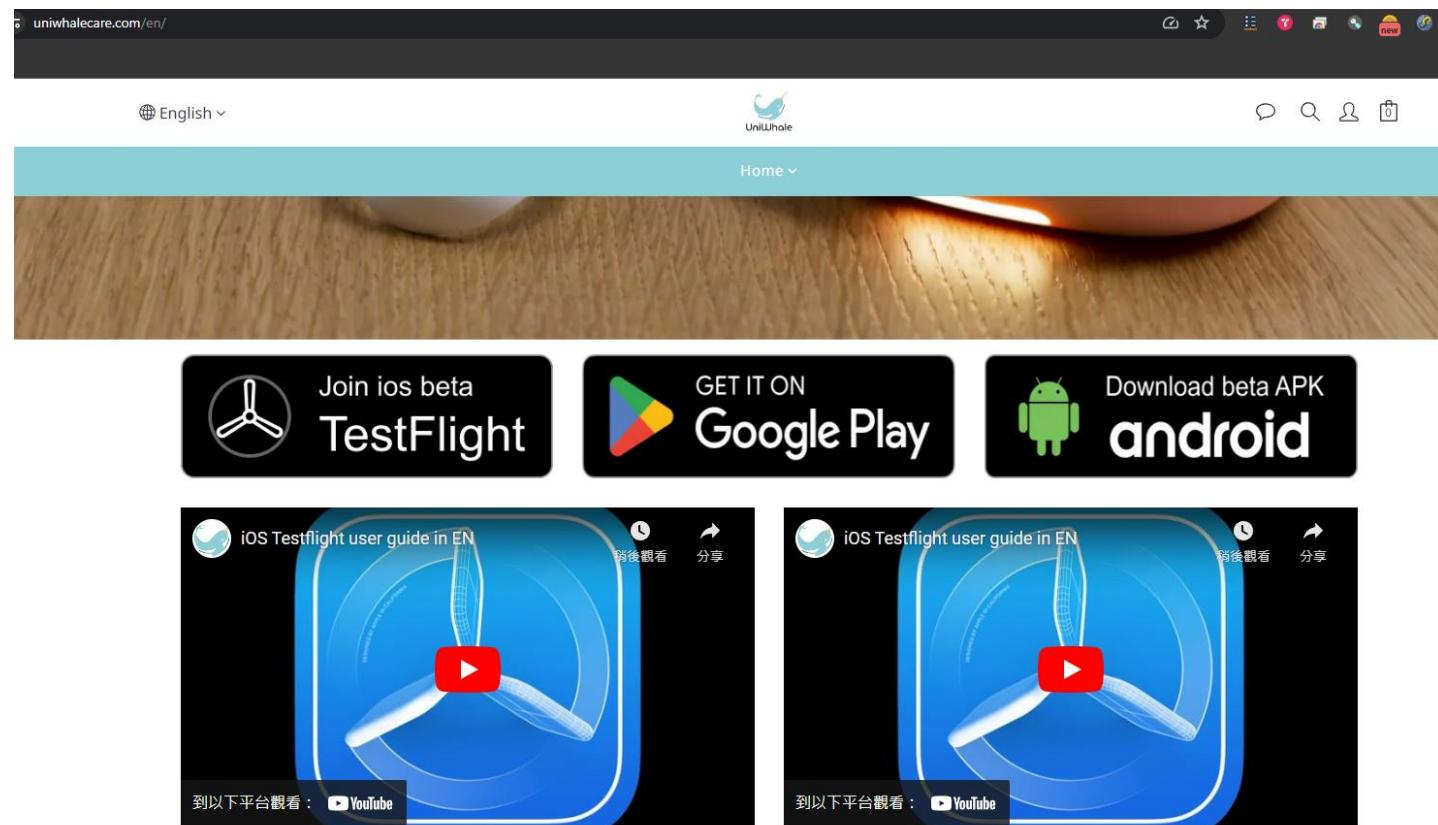

When the station is connected to the power, the night light will start flashing white.

When charging,  
the white  
UniWhale is  
pointing  
upwards!

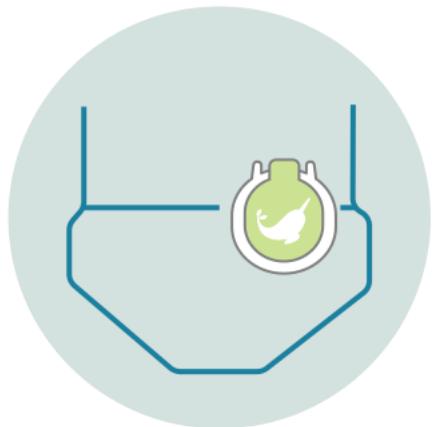

## 2. Download the mobile app and register an account

Please visit our web site to install APP at  
<https://www.uniwhalecare.com/en/>

### **3. Follow Instruction of APP to Setup**

Please follow the instructions of the app when your mobile phone is connected to the Internet and turn on Bluttooth.

## Part III: How to wear

front  
(Whale pattern  
facing up)

reverse side  
(Sensing probe  
facing outward)

Assemble the tag and buckle.

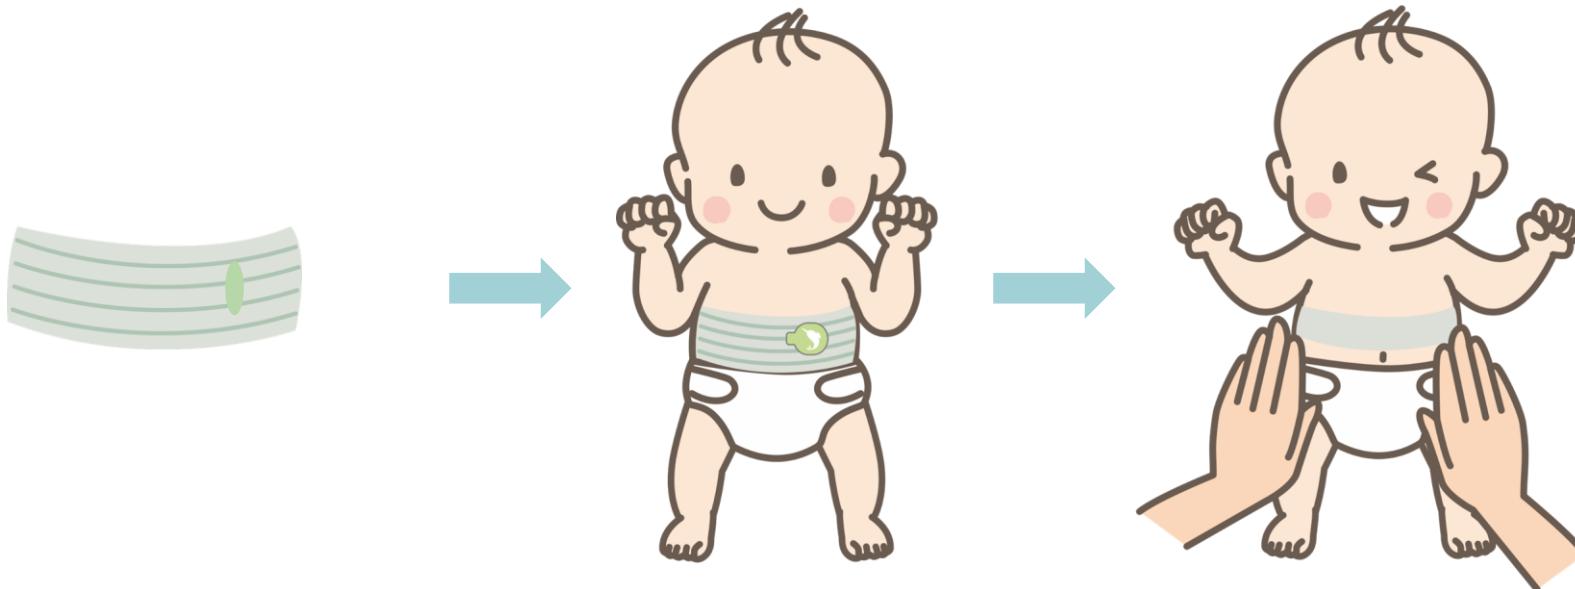

The sensing probe should be attached to the skin of the baby's abdomen, and it is recommended that the appropriate position be on the right side of the skin below the navel to avoid touching or rubbing the navel.

For newborns who are small or less than six months old, it is recommended to use a belly circumference to strengthen immobilization.

Complete the fitting. Sensing probe required  
Tight adhesion to the skin

# Cotton Lycra Breathable Belly - Usage

Confirm that two elastic belly circumferences are included in the box, XS is suitable for babies aged 0-6 months, S is suitable for babies aged 6 months to 1 year, and M is suitable for babies over 1 year old.

Open the elastic belly with both hands, and wear it above the baby's belly from the foot above the belly button, and align the patch circle directly above the belly button.  
To avoid the navel and diapers to use.

The front and back of the belly circumference can be adjusted to fit the baby's body flat to improve wearing comfort.

## FCC Warning

### FCC ID: 2BGXJ-UWRB301

#### Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

#### IMPORTANT NOTE:

#### Radiation Exposure Statement:

The product comply with the US portable RF exposure limit set forth for an uncontrolled environment and are safe for intended operation as described in this manual. The further RF exposure reduction can be achieved if the product can be kept as far as possible from the user body or set the device to lower output power if such function is available.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
