POWER ON / OFF
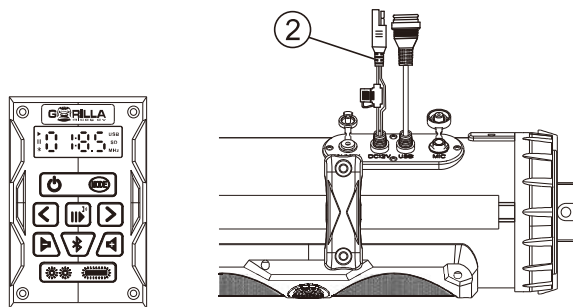

Connect the 12V plug cable of the host power supply

1. Insert the appropriate plug cable into ② to power on the host.

$\oplus$ Black and white lines

$\ominus$ Black line
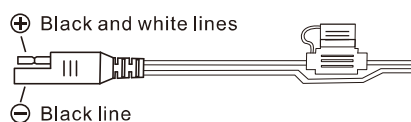

2. Power On: After powering on, briefly press the ⏻ button to turn on the machine.

3. Power Off: Short press ⏻ key in the power on state to turn off the device.
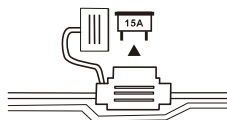

Remove the 15 Amp Blade Fuse from the Fuse Holder.

1. If the fuse holder is wet, do not remove the fuse. If wet, it may cause electric shock and injury.

2. To properly close, push firmly to ensure that the bottle cap clicks into place.

WARNING: The SoundBar does not have an internal battery. It must be connected to an external 12VDC power supply to function. When you install the SoundBar to a battery or a voltage regulator on a golf cart, a boat, a quad bike, a UTV, or another vehicle, you need to make sure that your vehicle battery or battery pack terminal voltage is 12VDC. If the battery terminal voltage is not 12V, you will need a DC–DC converter with output 12V. Connecting the SoundBar to a non-12VDC power source will lead to a malfunction or damage to the speaker.

BT OPERATION
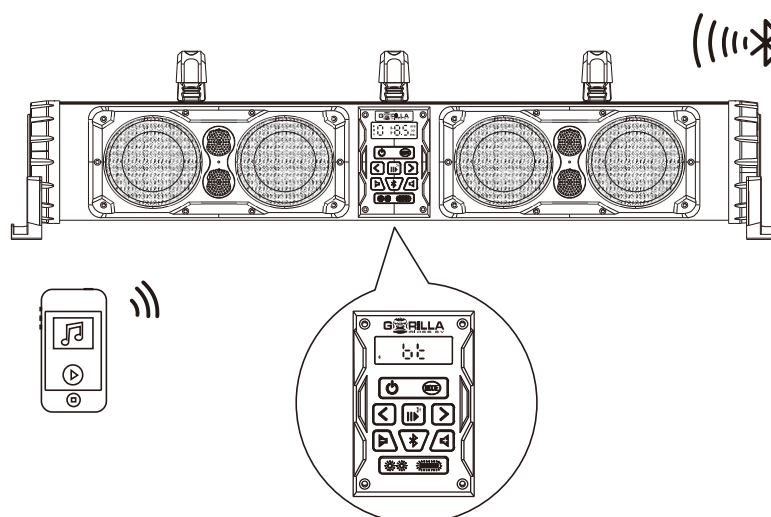

PAIRING BT DEVICES

1. Pairing mobile phones with hosts
    a) After powering on the host, switch to BT mode (at this time, the BT icon "BT" character on the display screen is flashing);
    b) Turn on the BT function on the phone and approach the host, search for the host's BT name: (GS29) to connect;
    c) After successful pairing, the host will display the "BT" character as a persistent light and emit a "BT connected" prompt sound;
    d) Now you can open your mobile music player and play BT music.

2. When the phone actively disconnects or leaves the receiving distance range, the host displays a flashing "BT" character, The host will also emit a "BT disconnected" prompt sound.

3. If there is a password prompt when pairing some phones, the initial password will default to "0000" or "1234"

BT OPERATION
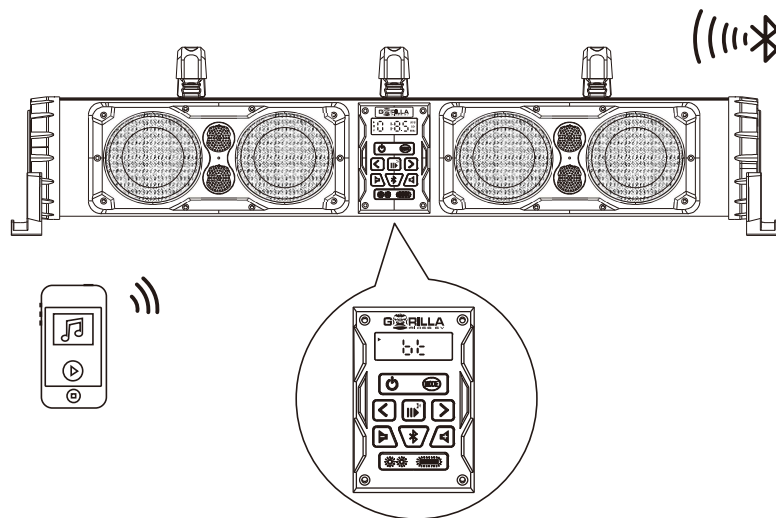

MULTIFUNCTIONAL CONTROL BT OPERATION

1. Press the ▌▌▶ button once to start playing music.

2. Press the ▌▌▶ button again to pause playback of the sound.

3. To play the next song, press the ❯ button.

4. To play the previous song, please press the ❮ button.

VOLUME CONTROL

1. To raise the volume, press the ◀ VOLUME UP button or use your device's controls.

2. To lower the volume, press the ▶ VOLUME DOWN button or use your device's controls.

1. To raise the volume, press the ◀ VOLUME UP button or use your device's controls.

2. To lower the volume, press the ▶ VOLUME DOWN button or use your device's controls.

AUX MODE
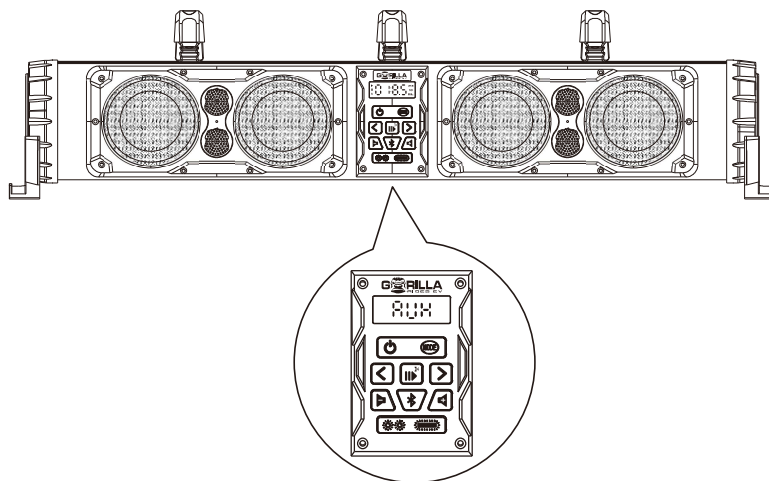

AUX Operation

1. In boot mode, short press the (MODE) buttons to select AUX mode, Do not display and skip AUX mode when no 3.5mm audio socket insertion is detected.

2. Short press ‖▶ button to enter silent mode.

3. Short press the ‖▶ button again to release the mute mode.

4. To play the next song, press the 〉 button.

5. To play the previous song, please press the 〈 button.

VOLUME CONTROL

1. To raise the volume, press the ◀ VOLUME UP button or use your device's controls.

2. To lower the volume, press the ▶ VOLUME DOWN button or use your device's controls.

BT Broadcast

Broadcast connection:
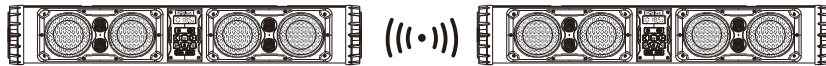

When you have two or more SOUNDBAR, you can use the BT broadcast function for playback.
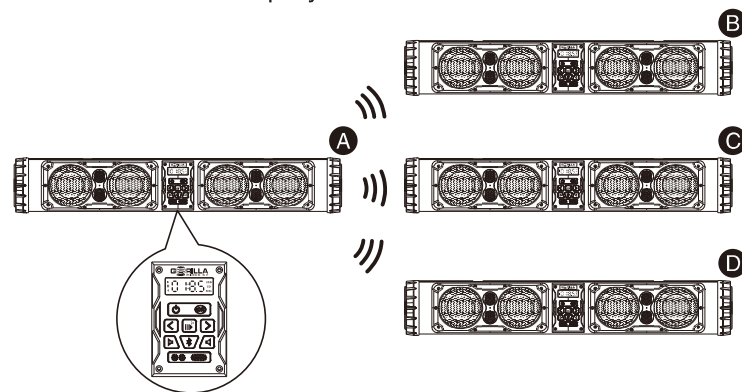

1. You can choose any audio device to turn on and define it as host **Ⓐ**. In the power on state and in BT or USB mode, long press the ✳ button on the panel to turn on the broadcast connection mode and enter the search state for host **Ⓐ**.

2. Long press and hold the ✳ key on any slave **Ⓑ**, **Ⓒ**, **Ⓓ** panel (slave **Ⓑ**, **Ⓒ**, **Ⓓ** is in power on mode and in BT or USB mode, other modes do not support this function). Opening the broadcast function will automatically search for connections

3. After successful connection, the same audio source can be played synchronously with the host **Ⓐ** (the first speaker to enter the broadcast by pressing the ✳ key is the host **Ⓐ**, and the speaker to turn on the broadcast function sequentially is the slave **Ⓑ**, **Ⓒ**, **Ⓓ**).

Broadcast disconnection and connection
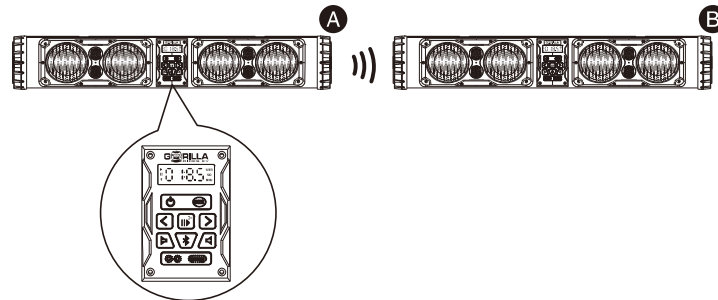

Hosts Ⓐ

1. Press the ✱ button on the host panel once in broadcast connection mode to disconnect all slave broadcast functions connected to the host.

2. Press the ✱ button on the panel again while the host is disconnected to restore the broadcasting function of connecting to all slaves before the host is disconnected.

Slave machine Ⓑ

3. Press the ✱ button on the slave panel once in broadcast connection mode to disconnect the current operation of the slave broadcast function.

4. Pressing the ✱ button on the panel again while the slave is disconnected will automatically restore the current slave broadcast function (without operating the host panel, pressing the ✱ button can reconnect)

Function operation in broadcast playback mode

Mode conversion

1. When in broadcast mode, press the (MODE) mode switch button on the host. Regardless of which mode the host switches to for playback (BT, USB drive, radio, AUX), the connected slave will play the same content as the host;

2. Pressing the (MODE) mode conversion key on the slave can only control the functions on the local slave, but cannot return to the control host for operation.

Select Song

3.Pressing the ❯ and ❮ up and down keys of the host in broadcast mode can control each slave to play the same content as the corresponding host.

4.Pressing the ❯ and ❮ up and down keys on the slave does not work and cannot return to the control host for operation.

Volume control

1.Pressing the ◄ and ► volume buttons on the host during broadcast mode can control the corresponding increase or decrease in volume for each slave and host based on their current volume.

2.Pressing the ◄ and ► volume buttons on the slave can only control the volume increase or decrease of the slave itself, but cannot return to the control host for operation.

3.Press the ❚❚▶ pause button of the host in broadcast mode, and each slave will output silently like the host.

4.Pressing the ❚❚▶ key on the slave will activate the pause/ mute or release pause/mute function (if the slave is connected to BT or has a USB drive inserted into the audio system, pressing the ❚❚▶ key will switch to the BT or USB drive playback status of the slave), and the slave cannot return to the control host for operation;

Note:

1. All slave machines cannot return to the control host by pressing the corresponding function key of the slave machine in the broadcast connection state, but can perform corresponding function operations on the local machine itself;
2. The karaoke function only supports sound from the local audio system and does not support broadcast transmission and playback;
3. The relevant functions and operations of the remote control are similar.

INSTALLATION DIAGRAM

1. Insert the left and right brackets of the host into the grooves on both sides of the host, and tighten the screws with a hexagonal spoon.
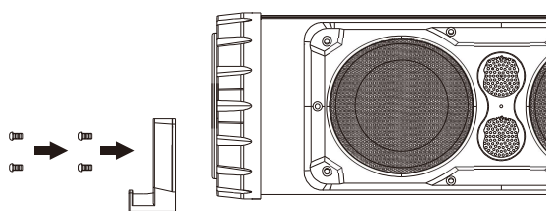

2. At a suitable installation location on the vehicle, fix the upper mounting bracket to the vehicle with screws and anti slip rubber pads, and then adjust the lower mounting bracket to correspond to the mounting bracket on the host, and tighten it with screws. (As shown in the figure below)
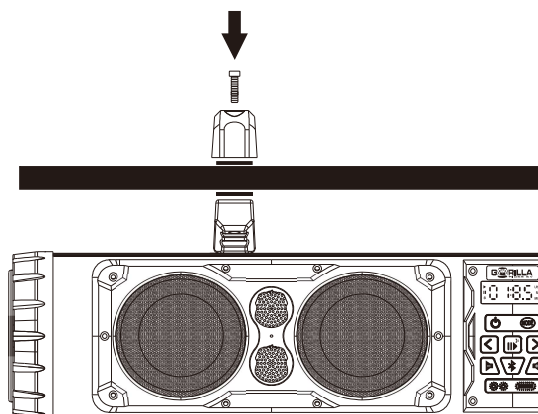

REMOTE CONTROL OPERATION

Cautions

1) Controller range: Up to 25ft (LoS)

2) Do not obstruct the remote with metal

3) Always stay away from small children

4) Do not store in direct sunlight

www.gorillaridesev.com

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and , if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.
If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the
equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-- Reorient or relocate the receiving antenna.
-- Increase the separation between the equipment and receiver.
-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-- Consult the dealer or an experienced radio/TV technician for help.

Warning: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

Radiation Exposure Statement
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
