

Sept 10th, 2024

**Nemko North America, Inc.**

303 River Road, Ottawa, Ontario, Canada K1V 1H2

Attn: Director of Certification

**Request for No Label on Unit – FCC**

**FCC ID: 2BH2H-C02XOG02000**

We request the approval for the label on the radio device in question, to not be placed on the physical device.

**Reason:** We want to ensure that the thermal specifications within the enclosed case are met. We must avoid damaging any affixed labels or electronic circuitry. Additionally, we need to prevent any physical labels from being placed in positions where they could peel off or hinder thermal convection in our final product.

The product is an LMA and will be installed within the host. To avoid damaging the module, it will not have its own label, instead, the FCC ID will be printed on the host label and included in the User Manual.

Sincerely,

Signed by:
