

C1SE

Manual Guide

Thanks for choosing KeenPlus! Please read this instruction manual before using this product. This guide will help you set it up and get you up with the operations you' ll use everyday!

Warm advice

1. To protect the new machine, we have attached a protective film to the MP3 player. If you want the best visual and operational experience, it is recommended to remove it.
2. The player has many built-in Internet applications, which will be better experienced in the WiFi environment. Of course, choosing to use it offline is definitely not a problem.
3. It is recommended to apply for a Google account before use, so that most Internet applications can use it to log in. Follow the link below to learn how to create a Google Account.

<https://edu.gcfglobal.org/en/googleaccount/creating-a-google-account/1/>

4. It is recommended not to execute too many large-scale applications at the same time, which will easily cause the

machine to heat up. Periodically clean up background executors manually or through clean software.

5. If the MP3 player will not be used for a short period of time, it is recommended to manually shut down the system to prevent excessive power consumption.

6. The MP3 player provides Google Store, you can download applications at will, but many applications are charged, please use with caution.

7. If the player crashes, insert the pointer into the reset hole to reset the system and restart the MP3 player. If the player still cannot power on, please check if the product is powered off.

8. Android operating system and Google input method support multiple languages, you can choose the language you need through system settings.

9. It is recommended to turn down the volume of the unit before using, headphones, and gradually increase the volume after you start listening until it is suitable.

Don't turn up the volume too high to protect your hearing, (Doctors point out that listening at high volume for extended periods of time, will damage the listener's hearing).

When tinnitus occurs, turn down the volume or stop using it.

10.It is recommended to back up the personal data stored in the player, before formatting.

11.Over-voltage: Power cable strain,bending or squeezing by heavy,objects is not allowed to avoid overheating or fire disaster.

12.Please keep the product away from the electromagnetic environment,excessive humidity,smoke and other harsh environments.

13.Do not immerse the product in water,and do not use any corrosive or abrasive cleaners to clean.

14.Do not expose the product to moisture or rain.It may cause equipment,failure or even hard to repair because of water and moisture penetration.

15.Do not use headphones while driving,riding,operating machinery,or,doing work that requires attention to outside sounds.

16.There is an automatic shutdown function in setting.
The following conditions must be met for achieving this function:

A. No programs running automatically in the background.

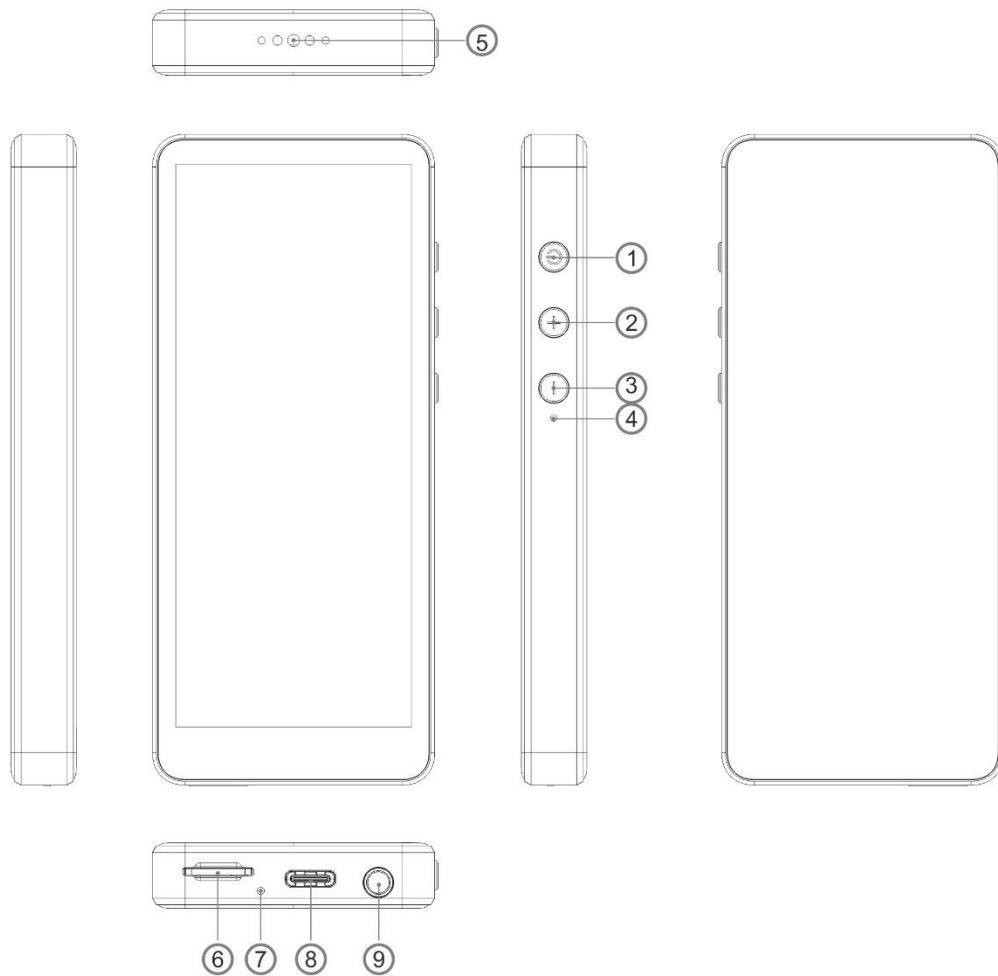

B.Can not be in the charging state.

Note:The automatic shutdown timer starts after the screen is completely turned off.

17.If the actual setting and using method of this product are inconsistent,with this manual due to firmware upgrade,please contact us.

Open the Package

Buttons Introduction

① Power on / off, Screen on/off ②Volume+ ③Volume-

④Rest hole ⑤Trumpet ⑥micro SD Card Slot ⑦

Microphone

⑧Charge port⑨Earphone slot

Note: if the battery is improperly replaced, there is a danger of explosion and it can only be replaced with the same type or equivalent type of battery. In order to protect the environment, give the waste battery to a professional organization for recycling.

6. Battery life may vary with usage conditions and production time.

7. Do not expose the battery to overheated environment such as sunlight or fire.

FAQ

1. The computer does not display the USB symbol when transferring files.

A: Since the device is Android system, the computer cannot display the USB symbol, however, you can open "Computer" or "My Computer" in your computer to view the disk name "YMP-A1" and continue the transmission.

2. The computer reminded that the format is not supported during the transmission of files.

A: Due to system reason, some formats may cause the computer to pop up, "format not supported" window when transferring files, in fact, they can be supported. When this window pops up, please select "Yes" and "Execute the operation on all files", the transmission will continue without appearing this window.

3. The navigation bar will disappear after open some applications

A:When the navigation bar disappears, you can check whether the navigation bar is hidden.

Steps:Settings Navigation bar Hide,navigation switch, and select Close. If there is no problem in the navigation, bar setting,you can pull down from status bar to open the notification bar and the navigation bar will be appeared,you can choose to exit and return.

4. Some video formats cannot be opened in the built-in video software?

A:This MP3 supports most popular video format in the market, but some special video formats do not support playback. For example, RMVB format videos are protected by copyright, so this MP3 cannot play videos in this format. Therefore, it is recommended that you play videos in a regular video format

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body.
