Note: The difference between M series, Y series and Q series is that the colors of the three series are different, and the others are exactly the same. Models in the same series only have different appearance because of their different market needs. They are identical in terms of structure, circuit, and have different model names according to different market needs. They are the same in terms of structure, circuits, circuits, screen printing, bits, RF modules, antennas, etc.

Yours sincerely,
