4) If you need to delete the sharing, click the nickname of the sharing member in the main account sharing interface, and click "Remove sharing" to cancel the sharing.

## 6.Video Play

There are TF card video and cloud storage video. cloud storage video, please click "Cloud Video" after purchasing cloud storage. If you insert TF card, click "Card video" to watch TF card video.

After clicking the card video / cloud video option, different dates will be displayed, and click to view the selected date video. When watching the video, multiple function options are displayed. From left to right are: "sound", "record screen," screenshot "and" HD". (TF card video supports up to 4 times speed playback, and cloud video supports up to 8 times speed playback)

## 7. VIP Cloud Server

Provide bird identification, cloud storage AI event services, bird Wikipedia and other services. The monitored dynamic objects are automatically captured in time. AI identification technology is used to automatically identify birds, and send timely message notification. If you need upgrade to VIP service in the APP, Please click "Immediately enable" on the VIP service page, and select the type that you need to upgrade.

## 8. Install the bird feeder

Please install the bird feeder in an unobstructed environment and within the coverage of the wireless network.

### Install Method

Please install the standing bird bracket to the bird feeder with screws firstly.

Then you can bind our bird feeder on a tree with a hook & loop closure strap, install it on a wall with screws. hang on a Shepherd hook or fix it on a stake.

#### 1). Screw Fixing:

Please drill the hole on the wall at the bracket of the back of the bird feeder.

It is recommended to mark the wall with a pencil before punching.

Stick the expansion nut into the wall, and then screw the bracket to the expansion nut to complete the fixation.

## 2). Hook & Loop Closure Strap:

Please hang the bird feeder on the tree with the Hook & Loop Closure Strap.

## 3). Hang on the Shepherd Hook

We have installed an arched handle on the top of our bird feeder. You can hang the handle on a shepherd hook. If you don't have the shepherd hook, you can buy it from us.

## 4). Fix on the Stake

There is a screw hole at the bottom of our bird feeder. You can fix it with a stake. Our stake is also optional and you can buy it from us.

## 9. Camera Charging

When the battery is low, the power is low on HiBirds App. Please use the type C cable to plug the 5V / 2A charging adapter into the charging interface for camera. If the continuous low power state is not charged, the camera will automatically power off.

During charging, the charging icon is displayed on the APP. It need take around 8 hours for the camera full charging.

## 10. Firmware Upgrade

When you connect to your camera via HiBirds App, there are firmware updates. The Version is prompted for an upgrade. You can also view the current firmware version in the App Camera Settings-Device Details.

**Note:** Make sure your camera is fully charged or connected to the power adapter before the firmware upgrade.

Do not turn it off during the camera upgrade.

## Frequently Asked Questions:

### 1. Is the APP only in English, or any other languages available?

Chinese, English, Portugal, Korean, German, Spanish, French, Thai, Turkic, Vietnamese, Polish, Japanese, Italian, Russian, Russian.

### 2. How far away should the camera be placed from the router?

After testing, the WiFi connection distance is 15 meters in the open space. The actual situation depends on the intensity of WiFi and the surrounding environment (too thick wall, electromagnetic wave equipment, metal, experience the interference to WiFi signal), such as the camera connection signal is weak or Unstable, please place the camera as close as possible to the router.

### 3. How to charge?

When the battery is low, the power is low on the HiBirds App. Please use the type C cable to plug the 5V / 2A charging adapter into the charging interface for camera. If the continuous low power state is not charged, the camera will automatically power off. During charging, the charging icon is displayed on the APP.

### 4. Does HiBirds need WiFi to operate? Does it have local storage?

HiBirds bird feeder camera does require a 2.4Ghz WiFi connection. Once it is connected to your home 2.4Ghz Wi-Fi, it uses the connection to send bird real-time notify to your mobile device. It does not support 5G wireless network. It supports TF memory card local storage in FAT32 format, and the maximum capacity supports 128G.

5. What's the maximum video duration?

You can choose the length of 10S, 20S and 60S in the App. According to the continuous duration of video recording, the maximum length of recording the video is 1 minute.

6. Overall a poor performer short battery life for its purpose and limited

WIFI range which makes it unusable for good placement? It depends on the working time of the camera. Please connect the charging cable to the solar panel for continuous charge during daylight, then you can constantly have the stream running.

7. Has it the night vision function?

Built- in infrared lamp beads, with only faint red light visible during night vision, ensuring clear video in no light or low light environment.

8. Is HiBirds weatherproof? What are operating temperatures?

Yes, the smart bird feeder camera itself is weatherproof! It can work at a minimum temperature of -10°C) and a maximum temperature of 45° C). If this temperature range is exceeded, we recommend that the product be returned to the room to avoid damage.

9. Is it squirrel proof?

The bird feeder camera has a built-in microphone and speaker, and the real-time two-way audio function allows you to hear birds voice or chase annoying squirrels.

10. Device has a way to hang on a shepherds hook or must it be mounted?

Besides hanging on the tree with hook & loop closure strap or mounting on the wall with screws, HiBirds feeder can be also hung on a shepherds hook or fixed on a stake.

## FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.
