

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of a mobile phone, including the battery, camera, and other electronic components, placed next to a ruler for scale.
Solder Board-Component View 1	 A photograph showing a green printed circuit board (PCB) component, likely a camera module, placed next to a ruler for scale.

Solder Board-Component View 2	 A photograph of a small, irregularly shaped green printed circuit board (PCB) component. The component is populated with various electronic components, including a large black integrated circuit (IC) in the center, several smaller surface-mount components, and a multi-pin connector on the right side. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component spanning approximately 20 mm in width and 15 mm in height.
Solder Board-Component View 3	 A photograph of the same green PCB component from a different perspective. This view shows the underside of the component, revealing the solder joints and the components mounted on the reverse side. A large, rectangular silver-colored component, likely a heat spreader or a large IC, is prominent on the right side. The component is placed on the same blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component spanning approximately 60 mm in width and 20 mm in height.

Solder Board-Component View 4	 A photograph of a green printed circuit board (PCB) component, labeled 'View 4'. The component is irregularly shaped with several cutouts and is populated with various electronic components, including two large silver heat-shielded chips. It is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm horizontally and 0 to 70 mm vertically.
Solder Board-Component View 5	 A photograph of the same green PCB component, labeled 'View 5', showing the opposite side. This view clearly displays a SIM card slot on the left, a large black rectangular chip labeled 'UNISOC' in the center, and a silver chip labeled 'Realtek' on the right. The component is again placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm horizontally and 0 to 60 mm vertically.
