

## TEST REPORT

**Report Reference No.....:** MTEB24070063-H

**FCC ID.....:** 2BHI7-RY-001

Compiled by

( position+printed name+signature)..: File administrators Alisa Luo

Supervised by

( position+printed name+signature)..: Test Engineer Sunny Deng

Approved by

( position+printed name+signature)..: Manager Yvette Zhou

**Date of issue.....:** Jul.04,2024

**Representative Laboratory Name.:** Shenzhen Most Technology Service Co., Ltd.

Address .....: No.5, 2nd Langshan Road, North District, Hi-tech Industrial Park,  
Nanshan, Shenzhen, Guangdong, China.

**Applicant's name.....:** Zhejiang Guanshuo Electronic Technology Co., Ltd

Address .....: East side of Wenzhu Road, Baihuashan Industrial Zone, Baiyang  
Street, Wuyi County, Jinhua City, Zhejiang Province

**Test specification/ Standard .....:** 47 CFR Part 1.1307

47 CFR Part 2.1093

TRF Originator .....: Shenzhen Most Technology Service Co., Ltd.

**Shenzhen Most Technology Service Co., Ltd. All rights reserved.**

**Test item description .....** Remote Control

Trade Mark .....: N/A

Model/Type reference.....: RY-001

Listed Models .....: N/A

Modulation Type .....: FSK

Operation Frequency.....: 433.92MHz

Hardware version .....: GS-PBJ-002

Software version .....: GS-PBJ-002-V1.0

Rating .....: DC 3V by Batteries

**Result.....:** PASS

**TEST REPORT**

Equipment under Test : Remote Control

Model /Type : RY-001

Listed Models : N/A

Remark : N/A

Applicant : Zhejiang Guanshuo Electronic Technology Co., Ltd

Address : East side of Wenzhu Road, Baihuashan Industrial Zone, Baiyang Street, Wuyi County, Jinhua City, Zhejiang Province

Manufacturer : Zhejiang Guanshuo Electronic Technology Co., Ltd

Address : East side of Wenzhu Road, Baihuashan Industrial Zone, Baiyang Street, Wuyi County, Jinhua City, Zhejiang Province

<b>Test Result:</b>	<b>PASS</b>
---------------------	-------------

The test report merely corresponds to the test sample.

It is not permitted to copy extracts of these test result without the written permission of the test laboratory.

## 2.1 RF Exposure Compliance Requirement

### 2.1.1 Standard Requirement

According to KDB447498D01 General RF Exposure Guidance v06

#### 4.3.1. Standalone SAR test exclusion considerations

Unless specifically required by the published RF exposure KDB procedures, standalone 1-g head or body and 10-g extremity SAR evaluation for general population exposure conditions, by measurement or numerical simulation, is not required when the corresponding SAR Exclusion Threshold condition, listed below, is satisfied.

### 2.1.2 Limits

The 1-g and 10-g SAR test exclusion thresholds for 100 MHz to 6 GHz at test separation distances  $\leq 50$  mm are determined by:

$$\left[ \frac{\text{max. power of channel, including tune-up tolerance, mW}}{(\text{min. test separation distance, mm})} \right] \cdot$$

$$\left[ \sqrt{f(\text{GHz})} \right] \leq 3.0 \text{ for 1-g SAR and } \leq 7.5 \text{ for 10-g extremity SAR, where}$$

$f(\text{GHz})$  is the RF channel transmit frequency in GHz

Power and distance are rounded to the nearest mW and mm before calculation<sup>17</sup>

The result is rounded to one decimal place for comparison

The test exclusions are applicable only when the minimum test separation distance is  $\leq 50$  mm and for transmission frequencies between 100 MHz and 6 GHz. When the minimum test separation distance is  $< 5$  mm, a distance of 5 mm is applied to determine SAR test exclusion

## 2.1.3 EUT RF Exposure

$$\text{EIRP} = \text{PT} \times \text{GT} = (\text{E} \times \text{D})^2 / 30$$

where:

PT = transmitter output power in watts,

GT = numeric gain of the transmitting antenna (unitless),

E = electric field strength in V/m,  $10^{(\text{dB}\mu\text{V/m})/20} / 10^6$ ,

D = measurement distance in meters (m)---3m,

So  $\text{PT} = (\text{E} \times \text{D})^2 / 30 / \text{GT}$

The worst case (refer to report MTEB24070063-R) is below:

Antenna polarization: Horizontal		
Frequency (MHz)	Level (dBuV/m)	Polarization
433.92	76.09	Peak
433.92	50.29	Average

Antenna polarization: Vertical		
Frequency (MHz)	Level (dBuV/m)	Polarization
433.92	75.32	Peak
433.92	51.1	Average

For 433.92MHz wireless:

Field strength=76.09dBuV/m

Ant gain 3dBi;so Ant numeric gain=2

$$\text{EIRP} = \text{PT} \times \text{GT} = (\text{E} \times \text{D})^2 / 30 = (10^{(\text{dB}\mu\text{V/m})/20} / 10^6 \times 3)^2 / 30 = 0.000012$$

$$\text{So PT} = \text{EIRP} / \text{GT} = 0.000012 \text{W} = 0.012 \text{mW}$$

$$\text{So } (0.012 \text{mW} / 5 \text{mm}) \times \sqrt{0.43392 \text{GHz}} = 0.0016$$

exclusion=0.0016<3.0 for 1-g SAR

So the SAR report is not required.
