The ConductR

Bone Conduction Speaker

User Manual

Buttons:

1. Lanyard hole
2. AUX
3. Mic slot
4. LED Indicator
5. Charging port (Type C)
6. TF card

Single Speaker Operation:

1. Long-press the power key until you hear the voice indicate "Power on."
2. Turn on your phone's wireless and search for "ES2402" to pair.
3. Once connected, place the speaker on the surface of any hollow object to play. You will get different sound effects from different hollow objects.

Double Speaker Stereo (TWS) Operation:

If you have 2 speakers, they can be paired together.

Turn both speakers on at the same time and wait for 3-5 seconds, the speakers will pair to each other automatically. (One of the two speakers must be paired to Wireless)

FM Function:

1. Short-press the M button to switch from Wireless mode to FM mode.
2. Short-press the Power button to search FM channels automatically.
3. Click the + or - button to select a channel

(* Suggested to use FM function outdoors, plug in USB cable as well to amplify the FM signal)

Charging:

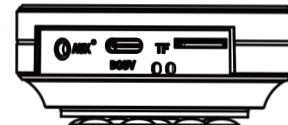

The charging cable can be used with a regular USB 5V charger. It is not compatible a fast charger. Especially with 9V 12V and other chargers whose output voltage is higher than 5V.

LED indicator:

When charging, the red LED will be lit. Once charged, the red LED will be off. When the Wireless mode is turned on, the LED blue light will blink. Once paired, the blue light will be always on.

Tips:

Before starting,
Peel off the protection film of the stick pad,
which on the bottom of the speaker,
then place the speaker onto
the surface of any hollow subjects.
Use a pin to assist when placing the
lanyard through the hole

FCC Warning Statement: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Radiation Exposure Statement

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
