Labelling Permission request for FCC Certification

FCC ID: 2BHMUGUS100A
Model number: GUS-1000-A

We are writing to request permission to place the FCC ID in the user manual and product packaging for our device.

The product in question is a compact communication module with dimensions of approximately 2.8 in long and 0.7 in in diameter. Due to the limited available surface area, including the FCC ID on the physical label would require a font size smaller than 4 points, rendering the information unreadable.

For this reason, we respectfully request approval to include the required labelling information in the user documentation and packaging instead of on the device itself.

Attached to this request are the labelling details, including dimensional specifications and a photo exhibit of the product.

Thank you for your consideration.

Sincerely,
