After connecting audio (BT AUX TF card) :
 - ① Short press the ④ key once is the breathing mode;
 - ② Short press the ④ key once again to switch back to the audio mode, and the Ferrofluid will dance with the rhythm of the music played.

MATTERS NEEDING ATTENTION

1. When the ferrofluid is in granular form, please use the attached small magnet accessories to manually adsorb and condense.
2. With different music/sound, the ferrofluid will present condensed, scattered, floating, sinking and other states, which is the physical characteristics of the ferrofluid, not a quality problem.
3. It is forbidden to use it in high temperature and sun exposure environment. High temperature (such as inside a car) and sun exposure environment will cause the liquid to expand and cause the glass bottle to burst. Product damage caused by high temperature, sun exposure, and external impact will not be supported after-sales service.
4. Part of the material components of the ferrofluid of the product are: pure water, mineral oil, and nano-iron powder, all of which are non-toxic and harmless.
5. Do not drop to avoid product damage caused by falling.
6. Do not disassemble, repair or transform this product by yourself.

SOLUTIONS TO COMMON PROBLEMS

1. After playing for a long time, the speaker automatically shuts down:
The power is insufficient, please connect the external USB power adapter and use it after charging.
2. When connecting Bluetooth to play music, there is a delay:
Confirm whether the valid connection distance of the Bluetooth device is exceeded, or there is an obstacle between the Bluetooth device and the Bluetooth device.
3. Pairing unsuccessful:
 - a. Check whether the Bluetooth device is in the search state, or restart the speaker.
 - b. There are too many Bluetooth devices around, which makes it difficult to search.
Please turn off other Bluetooth devices and search the connection again.

FCC warning:

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
