Thermo Mode controls the temperature of a room and heating device.

Thermo Mode

- 1 Humidity
- 2 Room Temperature
- 3 Electricity Consumption
- 4 On/Off Mode & Thermo Mode
- 5 Window / Door Status
- 6 Standby / Activate
- 7 Key Lock
- 8 Timer(1H/2H/3H)
- 9 Program Mode
- 10 Program Setting
- 11 Button for Room Temperature Setting
- 12 Button for Device Temperature Setting

Smart Switch 02 Control Under Thermo Mode

Before using your device, you must set the temperature after entering thermo mode.

Room Temperature Setting

Press the room temperature symbol to set the temperature. There is a default temperature of 18 °C.

Adjusting the temperature by rolling the small white ball. It's range is from 7 to 32°C .

The color of the area surrounding the figure would change depending on different numbers.

Smart Switch 02 Control Under Thermo Mode

Heating Device Temperature Setting

Press "  " symbol to set temperature of heating device. Its range is from 7 °C to 70 °C.
It is important that the device's temperature is not set higher than 30 degrees Celsius when it is used to control under floor heating.

If the NTC of the heating device is not connected to the Smart Switch, a warning appears on the screen when you press the symbol of device temperature.

Smart Switch 02 Control Under Thermo Mode

By default, the temperature is set at 30 °C, but you can adjust it between 7 and 70 °C. Once the settings have been made, click the "confirm" button. Activate mode will work based on your settings when you select it. Even if the device's set temperature is not reached, the heating process will stop as soon as the room temperature reaches the set temperature.

Moved the snow ball to get 45°C on screen.
Press "confirm" once you have reached the desired temperature.

Smart Switch 02 Control Under Thermo Mode

Under " Thermo Mode " , you can control both room temperature and heating device temperature by using 4 different work modes and other features. The work modes are Standby, Timer, Activate and Weekly Program. Here Standby and Activate mode is able to be selected automatically based on the temperature settings.

Standby

Activate

Timer

Weekly Program

Standby / Activate

Activate mode makes Smart Switch starting to work. In addition, if there is a temperature setting, it will run accordingly. In the meantime, Standby mode allows the device to shut down.

Smart Switch 02 Control Under Thermo Mode

Timer Mode

These are 3 options in timer mode, 1 hour, 2 hours and 3 hours. When the device enters timer mode, it will work on the condition of set temperatures for a period of time you selected.

When Timer starts to work, the remaining work time appears under its symbol.

Smart Switch 02 Control Under Thermo Mode

Program Mode

Touching the key of Program Mode, you'll find the device is working at Activate mode. That is a default.

Running in Program Mode.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
