User Manual

Notice to all users:
This wireless carplay activator is for converting wired carplay to a wireless only, supporting original car unit which equipped with OEM wired carplay, and aftermarket radios, such as for Boss, Alpine, Pioneer, JVC, Kenwood, etc.

For Sony aftermarket radios XAV-AX series which have original wired carplay, the audio issue is not optimized. Please contact the customer service team first for the news before using this wireless carplay activator.

HOW TO CHECK A CAR HAS CARPLAY OR NOT

1.Plug an iPhone(running IOS 10 or newer) into the car USB ports with genuine factory lighting cable. If there is a notification pop up on iPhone like below , that your car has built-in Apple Carplay.

2.If there is a Carplay icon in the stereo menu, that your car has built-in Apple Carplay.

3.Contact your car dealer for help.

- 2 -

CONNECTION STEPS

1. Connect the box to the original car USB Data interface; Press the' APP' button or Enter to the Carplay page; Read box data and wait for a connection;

2. Turn on the Bluetooth of the iPhone, search for the Bluetooth Device naming: " AIBox-BT_**** ". Pair it and allow the Sync, finally click "Use Carplay"

NOTE:If you have connected to the original car Bluetooth or other Bluetooth devices, please disconnect them before connecting to the dongle.

3. After the connection, please wait for a few seconds and CarPlay interface will be shown;
