

**USER MANUAL (EN)**  
**Bamboo solar Bluetooth speaker**

**Overview**

1. Solar Panel

2. Type C input port

3. Volume control

4. Switch button: ON/OFF

**Specifications:**

Wireless Version: V5.1

Power Output: 3W

Power Supply: 5V-1/2A

Battery capacity: 300mAh

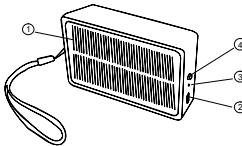

Input solar: approx. 100mAh / hour

Transmission Range: <10m

Input Line: approx. <10 dB

Charging time: via cable about 3-4h; via sunlight about 6-8h

Playing time: approx. 3h

**Charging the speaker:**

1. Connect the provided Type C charging cable to speaker Type C port;
2. Insert the other end to the USB port to a suitable power source (recommended wall charger with at least 5V/2A power);
3. During charging process red LED light will be visible; the LED light will switch off after charging process is finished;
4. Or alternatively put speaker under the sunlight to be charged via solar panel. Green LED light is visible during solar charging process.

**Connection to Wireless device:**

- Follow the operating instructions of your Wireless device for pairing with the speaker.
- Normally this is done by going to the "Wireless", "Set Up" or "Connect" menu and selecting the option to search for a Wireless device.
- Press the speaker button to power it on.
- When pairing, look for "LK-BTS-373" on your Wireless device and select this for pairing.
- When pairing is successful, you can hear some voice indicator.
- When the speaker is used again – second time or next times – newer devices should reconnect automatically. If connection fails, please follow the above steps in these instructions.

**Playing music:**

1. Press the speaker button to "Power on/off/Play music/Pause music".
2. You can also use your device to select "Previous track/Volume Down" or and "Next track/Volume Up".

**Safety instructions:**

- Do not drop or bump this product.
- Do not disassemble, do not repair the speaker yourself.
- Do not expose the speaker to water or other liquids with rated voltage for the speaker.
- Please disconnect the USB-C cable after charging finish.
- Charge the speaker battery at least once in 3 months' time to maintain proper battery life.
- Do not dispose of the device with household waste. For disposal it should be transferred to a specialized disposal company

## FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
