一、Planar structure diagram: Unit:MM

二、Product Parameter:

foot position	Path	Circle Number	Note
1 - 2	0.08*105P	11T	silk-covered wire

三、technical requirements:

1. Fix the ends of the wires securely to prevent any loosening or breakage of the wires.
2. According to the customer's requirements, cut the excessively long wire ends, tin them, and ensure that the tin coating depth is uniformly $3\pm1\text{MM}$.
3. Apply appropriate white glue on the magnetic plate, attach the coil, and during the process, keep the product surface clean and tidy.
4. The hard magnetic plates used have round holes and are free from any damage.

四、electrical parameter:

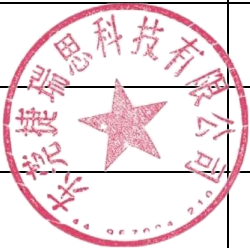

1. Inductance value, Q value:

PIN 1 — 2 = 6.8uH \pm 0.3UH

Q value \geq 45

The above inductance and Q value were measured using the Quanhua 1062A instrument, with a standard of 100KHZ/1.0Vrms or an equivalent instrument.
