foot position	Path	Circle Number	Remark
1 - 2	0.08*24	12	热风绞合线

三、technical requirements:

1. Fix the ends of the wires securely to prevent any loosening or breakage of the wires.
2. According to the customer's requirements, cut the excessively long wire ends, tin them, and ensure that the tin coating depth is uniformly 2 ± 1 MM.
3. Apply the appropriate white glue on the soft magnetic sheet, attach the coil, and during the process, ensure that the surface of the product remains clean and tidy.
4. The hard magnetic sheet used has round holes and is undamaged.
5. Additional processing (as per customer requirements): A 7.5*2.0MM magnet is installed in the central round hole of the finished product, and a 513-14MM back adhesive is attached to the back of the finished product, followed by packaging.

四、electrical parameter:

1.Inductance value, Q value:

$$\text{PIN 1 - 2} = 7.5\mu\text{H} \pm 0.4\mu\text{H}$$

Q value (before magnetization) ≥ 35

The above inductance values were measured using the Quanhua 1062A instrument. , Using 10 KHz/0.3 Vrms as the standard or equivalent instrument. The Q value was measured using the Quanhua 1062A instrument, with a standard of 100 KHZ/0.3 Vrms or an equivalent instrument.
