

Appendix - Internal Photographs of EUT Constructional Details

Model: JX-37

Photo 1

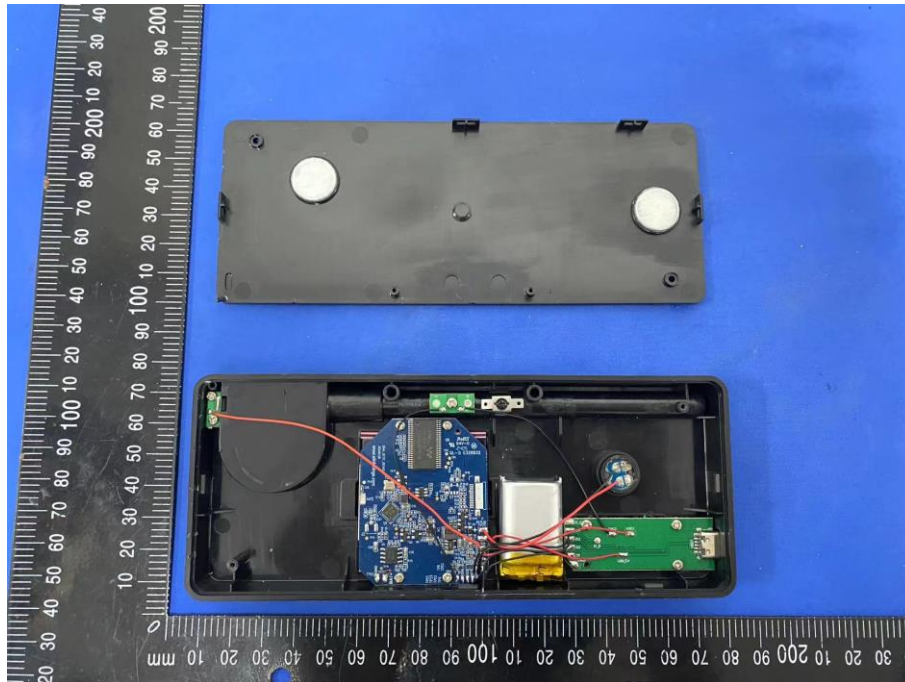

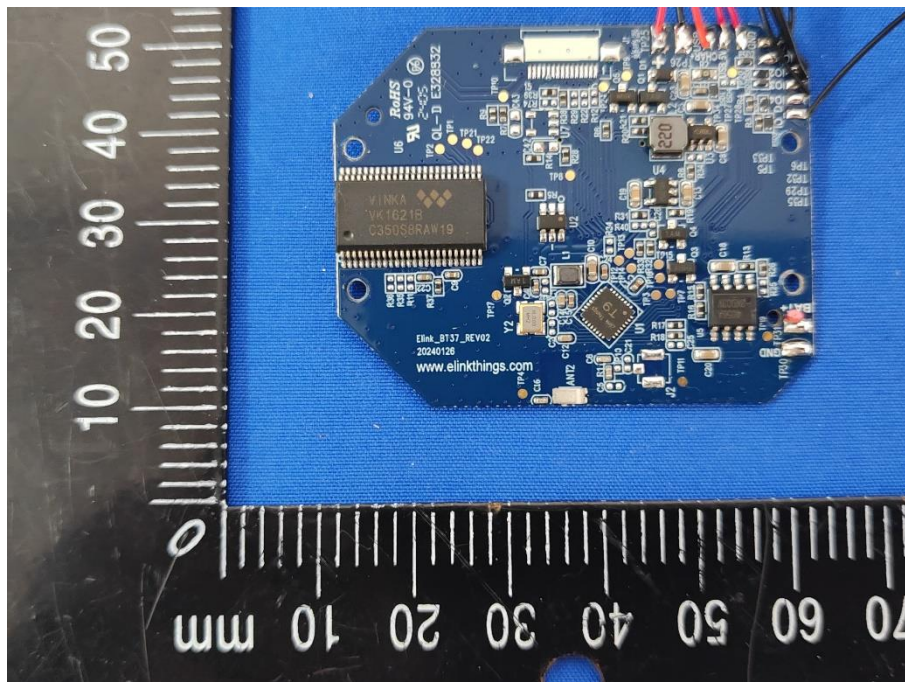

Photo 2

A photograph of a custom blue PCB with two LCD modules and a central chip, next to a ruler. The PCB is octagonal-shaped and features two LCD modules, one on the left and one on the right, each with a 16-pin header. A central white chip is mounted on the board. The board is populated with various components, including resistors and capacitors. A ruler is placed below the board for scale, showing measurements in millimeters.
