2.2. MEASUREMENT SETUP

Configurations to test: Side 1, 2, 3, 4 = 20cm away from the edge of the cooktop enclosure with 1.85cm in compensated as a mobile device at point a.

Configuration 2 E-field includes locations for points b, c, d, e. Measured per testing guidance from FCC approved ECR (Spatial Averaging Testing). See Figure 1 below.

Spatial Averaging Testing:

Measures E-field at points a, b, c, d, e on Z2 axis, vertically moving up/down from point "a" with 20cm separation distance. Sum (a, b, c, d, e) / 5 = result. Compare this to the applicable MPE limit (in percentage).
