FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: ‐ ‐ Reorient or relocate the receiving antenna. ‐ ‐ Increase the separation between the equipment and receiver. ‐ ‐ Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. ‐ ‐ Consult the dealer or an experienced radio/TV technician for help.This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and(2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Statement

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance of 20cm the radiator your body. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.

   the current event.

Note: Default holiday reminders cannot be edited.

Troubleshooting

Problem 1: The clock won't power on.

Solution 1: Ensure that the clock is properly connected to a power source with 5V/2A output. Ensure the power cable is not damaged, or try using a USB-C cable to connect the power and start the device.

Problem 2: The time is inaccurate.

Solution 2: Verify that the network connection is stable. Ensure the correct time zone is selected.

Note: Due to network latency, the second hand may have a delay of a few seconds.

Problem 3: The brightness is either too high or too low.

Solution 3: Touch the screen to access the menu, select the brightness section, and adjust the brightness using the slider. You can also activate the sleep mode for automatic brightness adjustment.

Problem 4: The volume is too loud or too soft.

Solution 4: Touch the screen to access the menu, select the sound section, and adjust the volume using the slider.
