Part name

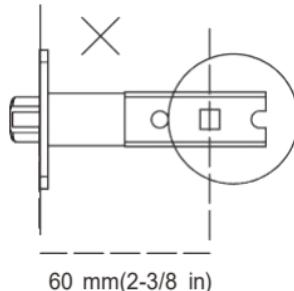

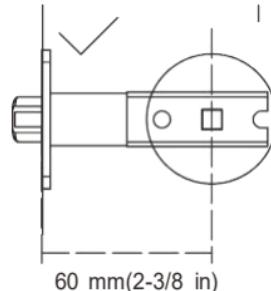

- ① Key
- ② Front level
- ③ Spindle
- ④ Cable
- ⑤ Door
- ⑥ bushings
- ⑦ latch
- ⑧ Mounting plate
- ⑨ striker
- ⑩ black level
- ⑪ Screws
- ⑫ Battery cover
- ⑬ Battery cover fix screw

1 Adjust The Backset of Latch (if NEEDED)

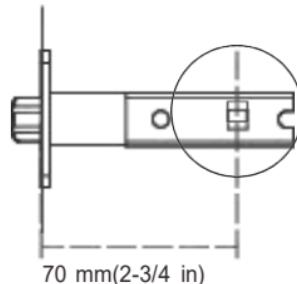

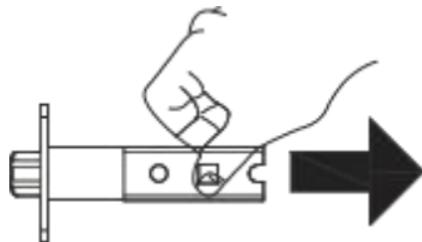

A Hold the latch in front of the door hole with the latch face flush against the door edge.

B If the latch holes are centered in the door hole, no adjustment is required. Proceed to step 2. If the latch holes are NOT centered, adjust latch. See "Latch Adjustment".

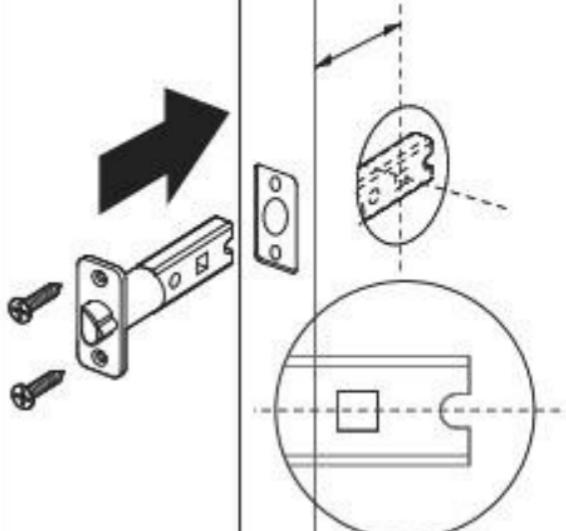

Latch adjustment (only if needed)

2

Install Latch

A

inside

B

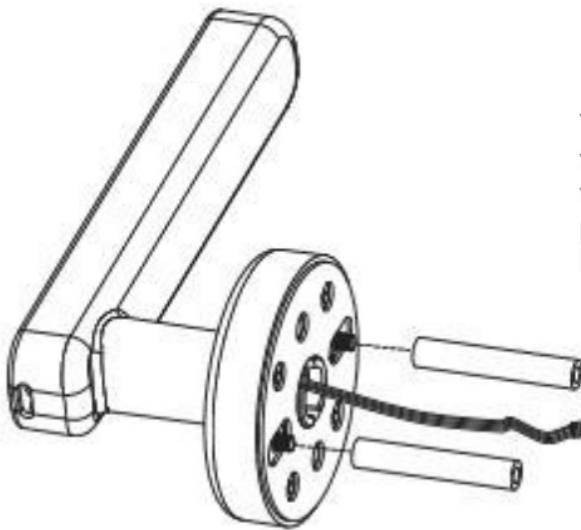

inside

Note:
The square hole
must be horizontal

3

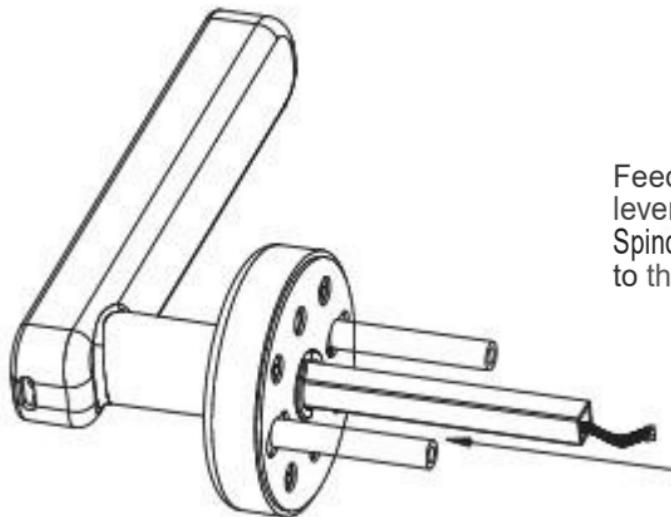

Screw 2 bushings onto the 2 threaded posts

Take the outside lever (with the touch pad). Screw 2 bushings onto the 2 threaded posts (in the horizontal position, same orientation as the lever handle).

4

feed the cable completely through the hollow spindle

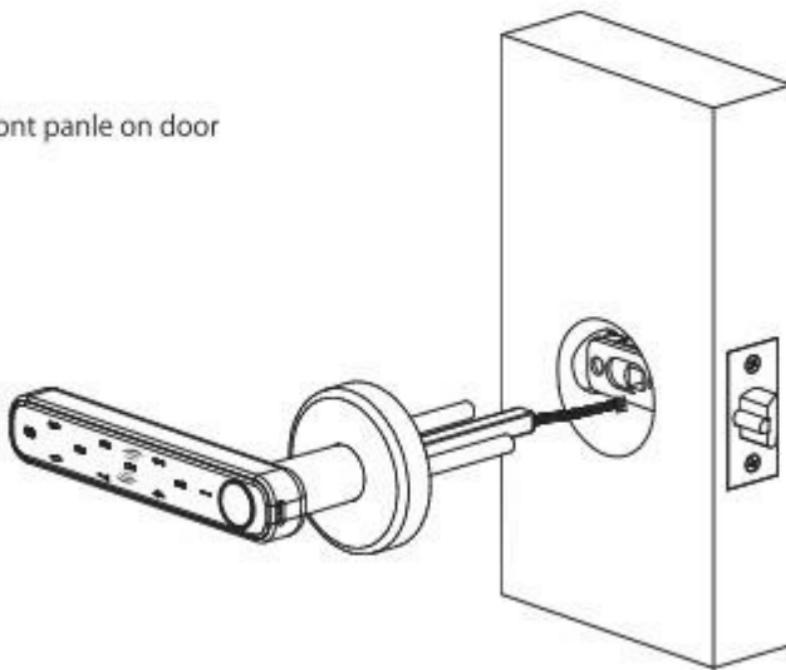

Feed the cable (pre-wired to outside lever) completely through the hollow Spindle .Be careful to avoid any damage to the tip of cable)

5

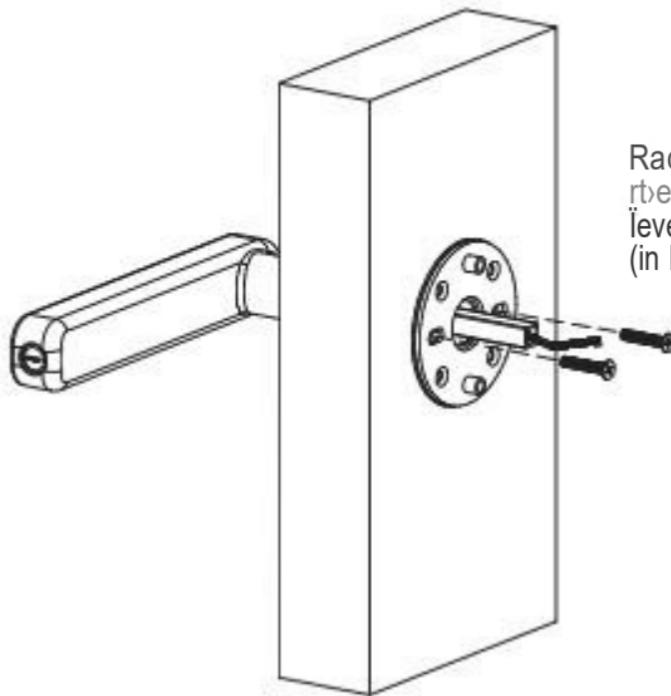

Install front panel on door

Install front panel on door

6

Attach to the outside lever to mounting plate

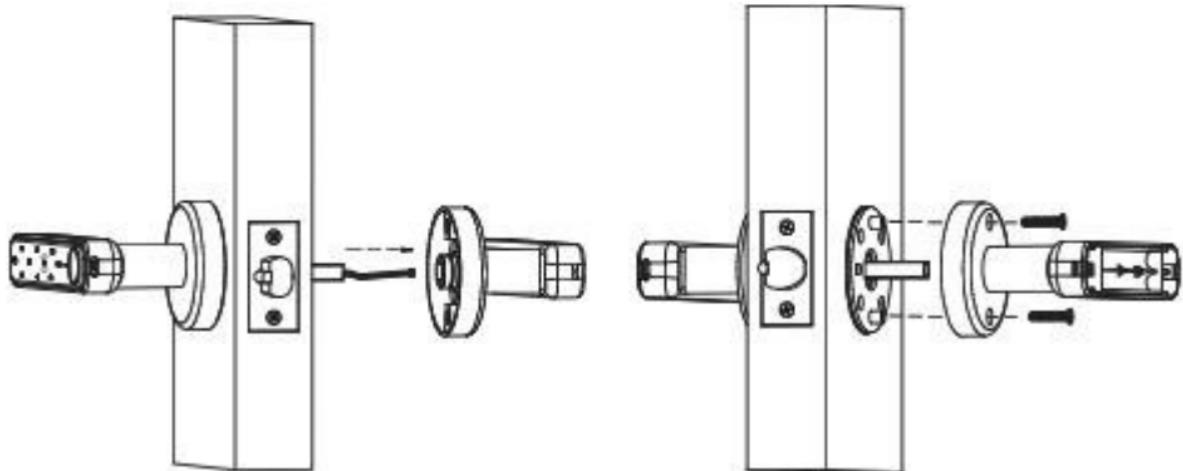

Mount the mounting plate on the INSIDE of the pre-bored door and attach the outside lever using 2 X M6 screws to the bushings (in horizontal position)

7

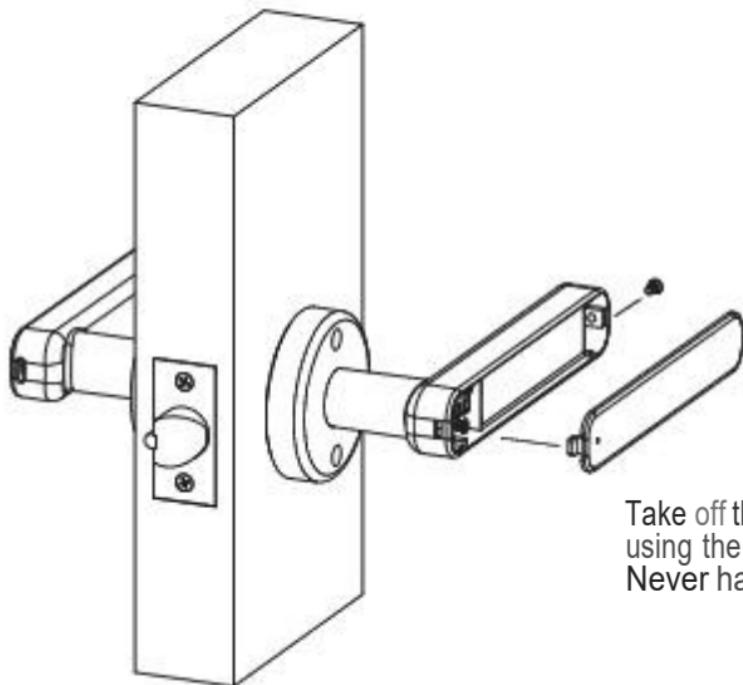

Attach the inside lever to the mounting plate

Attach the inside lever to the mounting plate
using two small screws in vertical position)

8

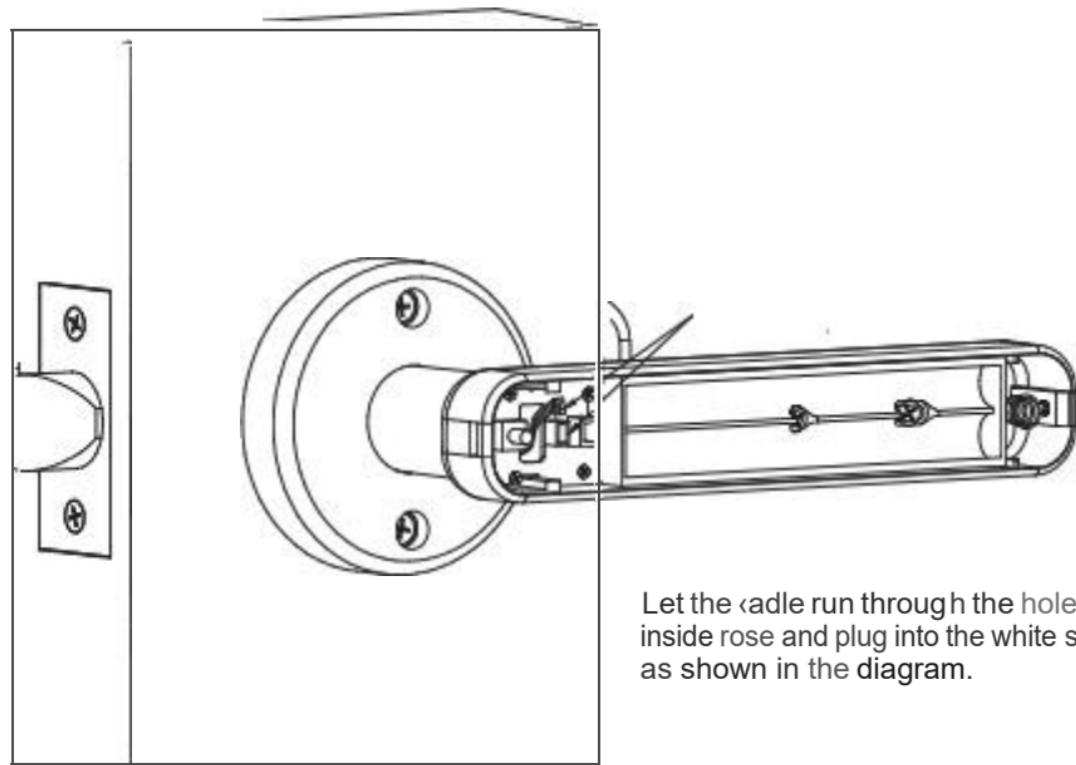

Take off the battery cover

Take off the battery cover (inside lever)
using the small strews at the end of the
Never handle

12

Factory reset

Clip pin

Use the pin, long press the factory reset button, wait until the fingerprint headlight is always on, release the button, the fingerprint head lights up green, and a long "Di" sounds, the factory reset is successful.

Local operation by Tuya

(It is recommended for users to primarily operate with the Tuya APP)

Note: Admin password: Only one admin password can be set locally.

Before networking with the Tuya APP, after adding a password locally, the Bluetooth turns off.

Adding a mobile APP requires operating in network mode.

1. Enter the following specific passwords for various local operations on the lock:

Setting admin password: Enter "1+#" in the initial state -> 12345678# -> Enter new password# -> Enter new password again# (Fingerprint sensor green light flashes, "long beep", admin password successfully set, initial password automatically invalid) .

Setting regular users: "1+#" -> Verify admin password -> Enter fingerprint, password, card.

"2+#" -> Verify admin password -> Switch to always open mode.

"3+#" -> Verify admin password -> Switch voice control.

"5+#" -> Verify admin password -> Request to network.

"8+#" -> Verify admin password -> Restore to factory settings.

2. Network operation process:

Note: The lock's low-power Bluetooth broadcast will automatically turn on when it is in factory settings or restored to factory settings, or after the APP is unbound. Before networking with the Tuya APP, After adding a password locally, Bluetooth automatically turns off. To add a mobile APP, local operation is required in network mode.

Operation process: Enter "5+#" on the lock side to enter the network status of the lock, the indicator light flashes. At this time, the user starts the Tuya APP on the mobile phone, and through the APP scans the device, confirms the connection, and the network is successfully set up.

3. Remote control addition(Remote control options)

Note: You must add the door lock to the mobile APP before you can use it.

1. Add the remote control: 6+# -> Verify administrator code -> Add remote control

long press the lock off button until the blue light flashes and then let go, and the remote control is as close to the door lock as possible.

2. Remote control removal: 7+# -> Verify administrator code -> Remove the remote control

3. The remote control itself is factory reset: press and hold the unlock button until the blue and red lights flash alternately, and then press the off button.

4. Factory Reset:

The lock end is generally equipped with a factory reset key, and long pressing the factory reset button will clear all the users who have been entered and restore to the factory condition; It is the default to clear the remote control (if the lock plate supports remote control function)

Tuya Smart APP

Scan the QR code to download the Tuya APP
or search for the Tuya APP in the app market

Door lock information can be removed, unbound and data cleared

Step 1:
Click here to enter the
Remove Interface

Step 3:
Unbind and clear data

Step 2:
Click Remove device

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference

e, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limi

ts are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following me

asures: -- Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver.

-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum 20cm distance between the radiator and your body: Use only the supplied antenna.
