Some parts of the manual (such as embedding diagrams) are provided as electronic files

Thank you for choosing the Clear Bathroom Electric Towel Warmer.

Before installing, using, and maintaining the electric towel warmer, please read this installation and user manual carefully. Before installation, be sure to read "Installation Precautions" (pages 2-3). Failure to follow this manual may result in personal injury or property damage. After installation, please explain to the customer how to use and maintain the product, and hand over this manual to the customer for safekeeping.

Before use, be sure to read "Usage and Maintenance Precautions" (pages 14-15). Please keep this manual properly for future reference. (Retain as needed) When purchasing the machine, please fill in the warranty certificate carefully and keep the warranty card properly after it has been filled and stamped by the store for warranty purposes.

## 2 SAFETY GUIDELINES

Please pay attention to this instruction

Ignoring the following instructions may result in death, serious personal injury, or property damage due to incorrect equipment operation.

The following symbols distinguish the hazards or damages caused by incorrect operation:

**WARNING** This indicates content that may result in death or serious injury.

**NOTICE** This indicates content that may cause personal injury or property damage.

Please adhere to the contents indicated by the following symbols:

**Prohibited** Content that prohibits such operations.

**Must** Content that must be followed.

## INSTALLATION PRECAUTIONS

For installers to read

### WARNING

Product installation

- Must be grounded** (Otherwise, in case of a fault or leakage, electric shock may occur)
- The power must be disconnected** (Otherwise, electric shock may occur)
- Ensure that the power cable is properly installed** (Otherwise, it may cause a fire)
- Installation must be carried out by professionals, and the product must be installed securely** (Otherwise, the product may fall and cause injury)
- During installation, a "full-pole power switch" with a moment separation distance of not less than 3mm must be installed in the power supply line to control or disconnect the main power supply. Its rated load capacity must not be less than 250V 15A, and it must be installed outside the bathroom for easy operation** (Otherwise, it may cause a short circuit, leading to a fire)
- The power cord should be a 60227 IEC type stranded flexible cord as specified in GB/T 5023.5, with a cross-sectional area of 3x2.5mm<sup>2</sup>** (Otherwise, it may cause a fire)
- The product should be installed such that people in the bathtub or shower area cannot touch the switches and other controllers** (Otherwise, electric shock may occur)
- Gas must be avoided from flowing back into the space through open airways or other open flame devices** (Otherwise, it may cause a fire)
- To avoid the danger of the thermal curtain heater rotating incorrectly, the product must not be powered by an external switching device, such as a timer, or connected to a circuit that is regularly switched on and off by a universal component** (Otherwise, it may cause a fire)

## 3 INSTALLATION PRECAUTIONS

For installers to read

Product installation

- This product must be used with a power supply that has a leakage protection switch compliant with I.E.C. (leakage current below 30mA)** (Otherwise, electric shock or fire may occur)
- The appliance should be installed in accordance with national wiring regulations** (Otherwise, it may cause a fire)
- Do not use a power supply with a rated voltage other than 220V~240V** (Otherwise, it will damage the product and may cause a fire)
- Do not use installation methods other than those specified in this manual** (Otherwise, the product may fall and cause injury)
- Do not place this product under a power outlet** (Otherwise, it may cause a fire)
- To avoid the danger of the thermal circuit breaker resetting incorrectly, the product must not be powered by an external switching device, such as a timer, or connected to a circuit that is regularly switched on and off by a universal component** (Otherwise, it may cause a fire)
- Do not remove the wiring cover plate during installation and use** (Otherwise, it may cause electric shock or fire)
- Do not install near curtains or other flammable materials** (Otherwise, the product may fall and cause injury)

### NOTICE

Product installation

- Please have two people perform the product installation** (Otherwise, the product may fall and cause injury)
- The product must be securely installed** (Otherwise, the product may fall and cause injury)
- When installing special parts such as hardware components, use the dedicated parts** (Otherwise, the product may fall and cause injury)
- After installation, the distance from the bottom of the product to the ground must be greater than 0.8 meters**
- Do not modify this product** (Otherwise, it may cause product damage or injury)

## 4 INSTALLATION PRECAUTIONS

For installers to read

### WARNING

Product installation

- Ensure that the pre-embedded power and control cables are intact and properly connected to the distribution box**
- The insulation surface of the power and control cables should not be damaged; otherwise, it may lead to leakage and electric shock hazards.**

### 1. Preparing to install the Towel Warmer

Towel Warmer

Accessories List

Part	Quantity
Screws	4
Expansion Rod	4

## 5 INSTALLATION METHODS

For installers to read

Surface Mount Installation

Attach the 1:1 positioning wallpaper to the wall.

Locate the corresponding holes and group them by the indicated model and the same color.

## 6 INSTALLATION METHODS

For installers to read

Surface Mount Installation

Use a 6mm drill bit to drill holes.

Insert the expansion rods into the drilled 6mm holes, hammer them in, and then remove the positioning wallpaper.

## 7 INSTALLATION METHODS

For installers to read

Surface Mount Installation

Tighten the screws to secure the base.

Base installation is complete.

## 8 INSTALLATION METHODS

For installers to read

Surface Mount Installation

Attach the towel warmer to the four fixed seats, tighten the screws, plug in the power cord, and complete the installation.

## 9 INSTALLATION METHODS

For installers to read

### Concealed Wiring Installation

Refer to pages 5-7 of Surface Mount Installation to complete the steps up to the image shown.

## 10 INSTALLATION METHODS

For installers to read

### Concealed Wiring Installation

Installation method for concealed wires, ignore this step in the open installation.

Cut the power cable of the towel warmer, separate the neutral wire (N), live wire (L), and ground wire (G).

## 11 INSTALLATION METHODS

For installers to read

### Concealed Wiring Installation

Installation method for concealed wires. Ignore this step in the open installation.

Connect the neutral wire (N), live wire (L), and ground wire of the towel warmer to the pre-embedded wires in the wall.

## 12 INSTALLATION METHODS

For installers to read

### Concealed Wiring Installation

USE A SMALL L-SHAPED BRACKET TO TIGHTEN THE SCREW ON THE 4 FIXING SLOTS.

Hang the towel warmer on the four reserved screw positions, pull down to secure it in place, and complete the installation.

## 13 FIRST USE

For installers to read

- After installation is complete, turn on the power and press each function button on the switch to check the following items:
  - Is the product heating normally?
  - Are there any abnormal noises or odors?
  - Are all the buttons on the controller module functioning correctly in the LCD display working normally?

## CONTROLLER MODULE

### Function Introduction

Temperature/Time Alternate Display

Power On/Off (Long Press)  
Timed Heating (Press)  
(1h ~ 24h)

## 14 USAGE PRECAUTIONS

For installers to read

### WARNING

#### To avoid fire or electric shock

- Power Cable**
  - Do not use a power cable other than the one provided (Using an unsupplied voltage may cause overheating and fire).
  - Do not use a damaged power cable (If the power cable is found to be damaged, it must be replaced by a designated service center. Do not replace it yourself).
  - Do not unplug the power plug by pulling the power cord.
  - Do not tug on the power cable.
  - Do not bundle or knot the power cable.
  - Do not hold the power cable excessively or bend it out of shape.
  - Do not place heavy objects on the power cable.

- During Use**
  - If any abnormality or malfunction occurs, stop using it immediately and unplug the power cable/power plug (If you hear abnormal noises, see smoke, feel excessive heat, or smell unusual odors during operation, immediately unplug the power cable/power plug and contact the service center).
  - Do not place medicines or chemicals on the shelf (Spilling chemicals can cause a short circuit and fire).
  - Do not use flammable sprays near the electric towel warmer.

- Power Plug**
  - Do not plug in or unplug the power plug with wet hands (Wet hands can cause electric shock).
  - Ensure the power plug is fully inserted into the outlet (Not fully inserting, such as inserting halfway, may cause electric shock, overheating, and fire).
  - Do not connect too many plugs or use multiple extension cords in one power outlet (This may cause the current to exceed the rated power of the outlet, leading to overheating, short circuit, overheating, and fire).
  - Regularly check the power plug and power cable for any abnormalities, such as overheating, rust, bending, or cracking (Check whether they may cause a short circuit in the power plug and lead to a fire).
  - Regularly clean the power plug with a dry cloth (Dust accumulation on the power plug can cause poor insulation due to its weakness, leading to a fire).
  - Ensure the power plug is unplugged before touching or cleaning the product (Otherwise, it may cause electric shock and injury).
  - Unplug the power plug if the product will not be used for an extended period (Otherwise, it may cause electric shock and injury).

## 15 USAGE PRECAUTIONS

For installers to read

### During Use

- Do not use a gas leak occurs, do not activate any functions of this product (It may produce sparks and cause an explosion).
- Do not disassemble or modify this product for repair (This may lead to electric shock or fire).
- Do not spray water or other liquids directly into the product (This may cause a short circuit, leading to electric shock or fire).

### NOTICE

- Maintenance Method**
  - Please use warm water and a soft cleaning cloth (or sponge) to wipe the product (Cleaning agents containing solvents or bleaching agents are harmful to this product).
  - If using chemical cleaning cloths, follow the usage instructions provided with them to clean the product.
  - When maintaining or repairing the towel warmer, please turn off the power or unplug it to ensure safety.
  - For indoor installation and use only.
  - Do not use wire brushes or other hard tools to clean the product to avoid damaging the exterior.
  - To avoid discoloration and accelerated aging of the product, do not use various thinners, alkaline cleaners, benzene, alcohol, disinfectants, etc.
  - Do not hang towels or underwear that may fade on the product's surface.
  - Do not hit the casing.

## 16 SPECIFICATIONS

### Parameter Description

PRODUCT CODE	P-K-0018
Product Dimensions	500*795*855
Input Power	AC 220V-250V 50HZ
Power	150-100W
Heating temperature	45-70°C
Drying Time	APPROXIMATELY 120 MINUTES
Timer Type	ELECTRONIC DIGITAL
Power Cord Length	1.3M

#### **FCC Warning**

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

#### **Radiation Exposure Statement**

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
