

Scan the QR Code

While logged into the app, use your smart device's camera to scan the QR code on the camera.

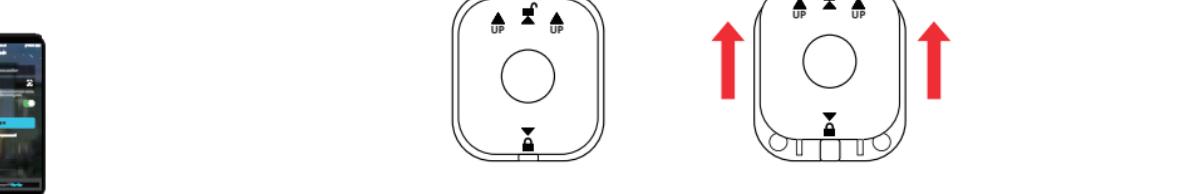

The app will then walk you through the remaining steps needed to connect your camera.

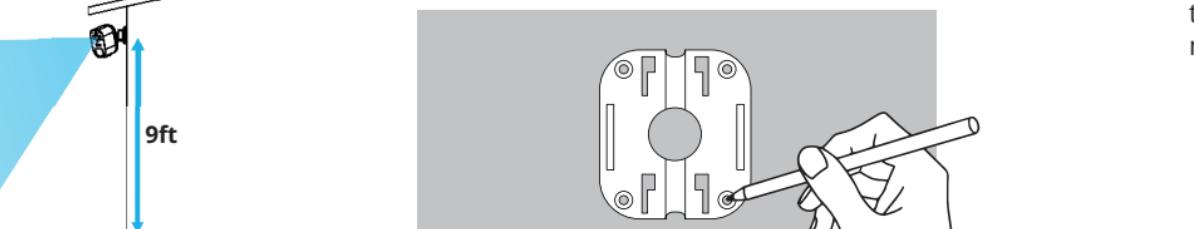

9

Battery Camera Installation

1. For best results, verify a strong Wi-Fi signal before outdoor installation. Connect to your phone's Wi-Fi and ensure a signal strength of at least 2 bars (out of 4) at the desired location.

2. Once you have confirmed the cameras mounting location, we recommend installation to be at a height of 9ft to maximize the Ai detection ability.

3. Please ensure that there are no obstacles blocking the view of the camera.

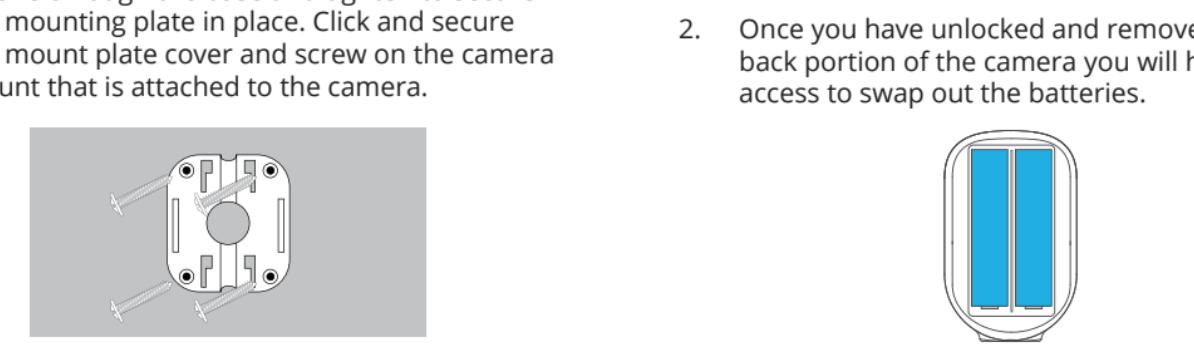

10

Battery Camera Installation (Continued)

1. Remove the back mounting plate by sliding the plate in the direction of the arrows shown on the mount.

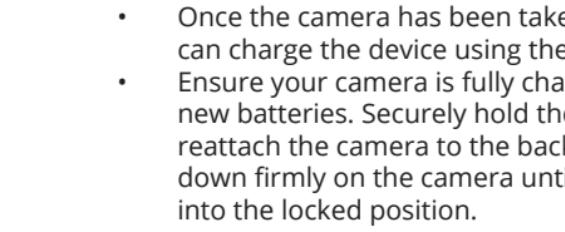

2. Use the holes on the base plate as a template to mark the screw positions on the surface where you plan to mount the camera.

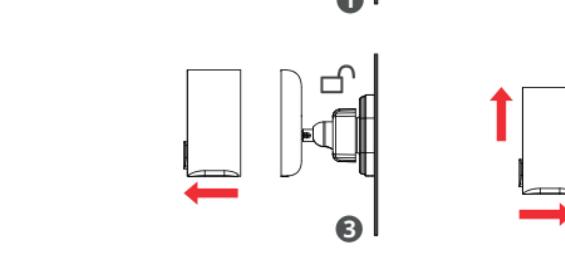

11

Battery Camera Installation (Continued)

3. Using a drill bit slightly smaller than the included screw anchors, drill into the mounting surface using the guide marks.

4. Insert the screw anchors. Line up the camera base holes with the screw anchors, insert the screws through the base and tighten to secure the mounting plate in place. Click and secure the mount plate cover and screw on the camera mount that is attached to the camera.

12

Changing the Batteries or Charging

1. Carefully hold the camera mount in place while pressing down on the camera to release the lock. You'll hear a "click" when it's unlocked.

2. Once the camera has been taken down you can change the device using the USB-C cable.

1. Please visit: Support.Night Owl SP.com

2. Enter BW4 into the Search bar or scan the QR code

3. Using a drill bit slightly smaller than the included screw anchors, drill into the mounting surface using the guide marks.

4. Insert the screw anchors. Line up the camera base holes with the screw anchors, insert the screws through the base and tighten to secure the mounting plate in place. Click and secure the mount plate cover and screw on the camera mount that is attached to the camera.
