十三、 sound

Click on the sound in the application interface to enter the application interface, which supports 16 segments of digital sound adjustment

十四、 Function parameters

specifications
Working voltage: DC 12V
Operating voltage range: 9V~16V
Maximum working current: 3A
Video part
Standard: NTSC, PAL (automatic recognition)
Input: 1VP-P (75 ohm)
Display section
Screen size: 8.8 "/10.25" /12.3"
Screen type: TFT/IPS
Resolution: 1280*480P/1920*720P
The environment
Operating temperature: -20℃~+70℃
Storage temperature: -30℃~+85℃

Working humidity: 45%-80%
Storage humidity: 30%-90%

Frequently

Asked Questions

1. Problem: no response to key operation (protocol failure), abnormal display, flower screen

Reason: model setting is not correct

Solution: enter the factory Settings to set the good model

2. Problem: No Bluetooth function

Reason: There is no Bluetooth pairing and connection with mobile phone

Solution: Enter the Bluetooth Settings and check the machine name and password

3. Problem: No navigation signal

Reason: No embedded navigation antenna or incorrectly set GPS antenna

Solution: Correctly embed GPS antenna

4. Problem: GPS doesn't locate

Reason: poor GPS signal or poor GPS antenna connection

Solution: move the position or replace the GPS antenna or reconnect the GPS antenna

5. There is no video on the dashcam

Reason: wrong type of dashcam

Solution: System Settings - Factory Settings -ARM Related Settings - Dashcam Settings -

Choose USB recorder or CVBS recorder, etc

6. No display of reversing vehicle

Reason: Wrong choice of reversing camera

Solution: enter the reversing Settings inside the Settings, choose the original car or rear camera, 360 panoramic reversing, etc

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
- This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
