Provide new and current users different apps to meet the different requirements.

- 1 Long press the power button in the center of the device for a few seconds to turn on, go to the Bluetooth settings of the iOS device, find the corresponding Bluetooth device name ending in '.Core' and pair it.

- 2 Start the control app, Look for the bluetooth icon and tap to open. Find the corresponding bluetooth device name with '.App' from the list and complete the connection.
- 3 If you see a green icon in the lower right corner of the control app , it means it has connect successfully.

ATTENTION:

1. The Bluetooth device can connect with one iOS device. If you have multiple iOS devices and want to use all, please order one per iOS device.
2. Please use the original charging cable for charging to avoid damage to the battery of the device.
3. Ask your sales agent or the official support to get the TestFlight app invitation code. TestFlight app will expire over time. Please update the app before the expiration date.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment
